RE and Worldviews · LAUNCH · Spring 1 · Week 4 · LAUNCH-RE-S1-W04 · Date _____

## How can belief support resilience without promising an easy outcome?

Today I can… ☐ link a source belief to a possible response and explain why hope is not a guarantee.

Feedback: ☐ VF ☐ WS ☐ I ☐ NS ☐ E ☐ R ☐ [//] ☐ [?] _____

RE learns about ethics and worldviews; this activity is not worship. Reflection is optional and never worship.

## STAFF ANSWERS

### Arrival · Supported

1. Care for need and effects on people.
2. A source treated as a guide or reason for a judgement.
3. No. Members may interpret values and make decisions differently.
4. Support, an achievable goal, a reason for hope or permission to pause; no personal account needed.

### Arrival · Standard

1. Both could care about urgency and harm, so whether another safe source was available mattered to the decision.
2. V1 appealed to a Christian sacred teaching; V2 described evidence, reason, empathy and discussion within a humanist approach.
3. It limited the claim to a possible view rather than making an unsupported universal statement.
4. It may shape meaning, motivation or a choice of action, but the practical effect depends on circumstances.

### Arrival · Stretch

1. The Christian application explicitly appealed to sacred teaching; the humanist application to evidence, reason and empathy. These could converge without being identical.
2. The Christian account could also use evidence and reasoning. The comparison concerned stated grounds, not whether either group could think or care.
3. They may interpret the teaching differently, weigh urgency or commitments differently, or predict different consequences while sharing some values.
4. Distinguish possible encouragement or meaning from a guaranteed outcome; do not assume everyone responds identically.

### Exit · Supported

1. Asking for help, using an available room or planning a smaller activity.
2. No. It records a reason and plan; the outcome is unknown.

## STAFF ANSWERS · continued

### Exit · Standard

1. The care belief gives a reason to continue; requesting help and adapting the activity provide practical ways to act. Neither guarantees success.

2. Pausing can be part of regulation or adaptation. The case gives no evidence that this person lacks resilience, and participation is not compelled.

### Exit · Stretch

1. It supports a possible link between a care belief, motivation and an adapted plan, not a universal or guaranteed result.

2. Credit a judgement such as: the plan may support continuing with help, while pausing remains a legitimate choice; later success and individual experiences are not established.

### Starter

Answer (adult): The checked, smaller step allows a worthwhile possibility without a guarantee. The other statement makes an unsupported promise.

### We Do

Answer (adult): H2 may encourage persistence in justice, but the story does not predict the garden's outcome or prove effort always succeeds. H4 supports a safety check and one repaired bed using available materials. H1/H3 can supply meaning/care/cooperation; help and permission to pause matter. Do not call immediate unsafe return resilience.

### You do routes

Starter: The checked, smaller step allows a worthwhile possibility without a guarantee. The other statement makes an unsupported promise.

We Do shared check: H2 may encourage persistence in justice, but the story does not predict the garden's outcome or prove effort always succeeds. H4 supports a safety check and one repaired bed using available materials. H1/H3 can supply meaning/care/cooperation; help and permission to pause matter. Do not call immediate unsafe return resilience.

You Do common criteria: relevant source detail; an explained link to the weekly outcome; accurate terminology; a precise qualification or ethical check; pupil-owned response and review. Independent, Supported and Choice test the same core thinking. Choice requires the pupil's own word, phrase or reason. Record actual support; an adult-selected answer is not pupil evidence.

Starter: TA action — Read the single question once and allow private thinking. Avoid — Do not provide the response or turn this into a second retrieval grid. Feedback script — "Tell or show me the reason for your choice."

You Do staff guidance: B fits available facts but credit a safe justified alternative. Explain a genuine source belief, a possible link to motivation/meaning/care and an H4 practical step. H2 is a parable, not evidence that persistence always succeeds. H3 offers a non-religious ground for possible hope. Respect pause/change and do not infer personal faith or strength.
