Teacher and cover planner

Change can feel hard

Wednesday 6 January 2027 · P1 · 40 minutes · Year A

BUILD · three to four learners · Spring 1 Week 1 · formative

Theme: Resilience & Change. Spring 1 has six weeks. Week 6 is assessing.

Thread tags: SMSC S/So (M/C: none); British Values IL/MR (D/RL/T: none).

Exact source outcome

Recognise that change can feel hard (Children's MH Week).

Source: BUILD Weekly - Spring, row 64, PSHE & Citizenship. B64 Spr1·W1; C64 exact outcome. Source strand and resource names are rendered generically under the names rule.

What this lesson teaches

A change to a familiar plan can feel hard. People can have different feelings about the same change. The lesson recognises feelings without judging them or diagnosing a problem. It does not require a personal story.

Success: identify what changes in a fictional story; link the change to the stated feeling; recognise that change can feel hard. A helpful step extends this learning.

Prepare

Books, pens, four copies of Support Cards and Vocabulary Mat, plus the adult evidence record. No scissors, phone, login or internet needed. Check the actual private help route and a place for a supported pause before teaching. Give an arrival task straight away. Arrange quiet individual response turns, not public questions.

Source and calendar

The parenthetical Children’s MH Week label is retained verbatim from C64. It is a curriculum label, not a claim that the event occurs on 6 January. The owner supplies this date and P1. Source D64–F64 names are replaced with generic feelings work, fictional scenarios and an evidence record; no accreditation is claimed.

Where this leads

This helps me cope with a changed plan and ask for clear steps in learning or future work.

Forty minute sequence

Chunk	Minutes	Teaching
Chunk 1	0–12	3 calm start and starter; 4 input; 4 model; 1 reset.
Chunk 2	12–25	6 guided story; 3 private hinge; 3 help choice; 1 reset.
Chunk 3	25–40	9 individual task; 3 feedback; 3 private exit.

The chunks last 12, 13 and 15 minutes. Two one-minute resets are already included in the 40 minutes. Give extra access time by reducing repetitions, never by requiring disclosure. Slides 11 and 12 add no teaching time.

Chunk 1

0–3: settle and privately compare “art first” with “art later”. Word bank and model are on card 1. 3–7: teach change, feeling and help; read the exact outcome and the plain-language version. 7–11: read A and model the link between a new time and feeling cross. Privately check what changed. 11–12: quiet pause, with a familiar neutral task if preferred.

Chunk 2

12–18: read B one line at a time. Learner points, says or records the changed room and unsure feeling. Keep A as the visible model. 18–21: private hinge using C. People may feel differently about a change. If not clear, model the two quoted feelings and use the parallel check. 21–24: choose a kind, practical first step. 24–25: quiet reset.

Chunk 3

25–34: individual D response in a book or through an aid/scribe. Keep all Level 2 aids in view. Link the changed order with the stated feeling; choose support if ready. 34–37: give one next step and keep the reply. 37–40: private exit with the sentence frame. Record learning, support and any gap. A pass is unobserved, not incorrect.

Scaffolds and response routes

Level 2 on every task

Keep a short word bank, sentence starter and visible worked model beside every task, including checks, help choice and exit. The task-to-scaffold list is in LESSON_SOURCE.json and on Support Cards. Independent means the learner supplies the thinking; it does not mean removing access aids.

Supported

Read one short line at a time. Keep word bank, starter and visible model. Offer two choices, pointing, an aid or a faithful scribe. Use the same change-and-feeling goal. Record any answer cue.

Independent

Use story D with the word bank, starter and visible model still in view. Identify the change and link it to the stated feeling. Choose a helpful step. Normal reading or scribing access stays available.

Aspire

Keep all Level 2 aids. Explain why the new plan could feel hard, then use story C to show that two people can feel differently. More writing or personal disclosure is not required.

Worked example and fade

Read A. Point to “art later” and “old plan was art first”. Say: “The time changed. The young person says they feel cross. The old plan felt familiar. Change can feel hard.” Show the written model. For B, ask privately for the changed thing, then for the feeling clue. Reduce answer cues only; leave the model, bank and frame visible.

Scribed route

Read the story without adding a feeling. Let the learner point, sign, use an aid or speak. Write the exact selection or words, read them back quietly and allow correction. Record reader/scribe access separately from an adult-supplied answer. No public retelling is needed.

Prompt ladder and TA focus

1 Point to place or instruction. 2 Ask one short question privately. 3 Rephrase instruction. 4 Offer scaffold or choice. 5 Model the first step only, then return the task. Allow processing time between prompts. In input, point to the words; in guided work, elicit one clue; in individual work, log help and fade answer prompts.

Book first

Pupil pages are reference cards, not write-on worksheets. Use a book, normal communication aid or a faithful scribe. Optional Type instead has the same task. Plan in any language. Do not ask learners to copy all source text.

Checks access and private help

Check after the model

Privately offer “time” or “person’s name” for what changed in A. Key: time. Ask for “art later” as the clue. If unclear, show the old/new words and re-model one step before B.

Main and parallel hinge

Main C: A everyone must feel the same; B people can feel differently. Key B, supported by keen and unsure. Parallel A: A change may feel hard; B change always feels easy. Key A, supported by cross. Do not use silence or a pass as evidence of misunderstanding. If unsure, reteach using the quote and repeat privately before D.

Planned adaptations

Cognition and Learning: one line at a time, visible example and short tasks. Communication and Interaction: literal words, wait time, aid and exact scribe. SEMH: predictable plan, private responses, pass and supported pause. Sensory and Physical: clear text, uncluttered page, comfortable seat and usual aids. EAL: read with the learner, point to the same words, rehearse privately and plan in any language. Numbers and words carry meaning; colour is optional.

Private help route

Say: “You can ask a trusted adult in private. You can point to HELP or say ‘Can we talk in private?’ You do not have to tell the group.” Use the school’s help route. If the first adult is busy or help is not enough, use the route to another trusted adult. A learner may pass, pause or use a neutral task and return with support.

Staff response

Confirm who can respond privately before the lesson. Listen calmly if a concern is shared; do not probe or ask peers to respond. Do not promise secrecy. Follow the school’s usual procedure and seek immediate on-site support if needed. Keep private concerns out of shared work and public evidence. This lesson teaches recognition and help-seeking, not treatment.

Misconceptions

“All change is bad.” Correct: a change can feel hard, welcome or mixed. “Everyone must feel the same.” Correct: use C’s two different feelings. “A hard feeling means failure.” Correct: it can happen; support and time may help. Never grade the feeling itself.

Evidence and feedback

What to keep

Keep one dated individual response to D, or a supported response to B. Record the change, stated feeling and link: “The order changed. They feel cross. Change can feel hard.” Pointing to the relevant words with a faithful record is valid evidence. A kind support step deepens the response but is not an extra condition for the exact recognition outcome.

Judgement

Secure: identifies a change and recognises its link to a hard feeling in the fictional example. Partial: identifies the change or feeling but not the link. Not yet: requires further modelling. Unobserved: no response collected, including a pass. Record actual access and answer prompts, not an assumed independent response.

Feedback and marking

Use one specific next step: “Show what changed” or “Link the change to the feeling”. Keep the first response and later reply separate. VF verbal feedback; WS worked with support; I independent; NS next step in green; // self-edit; ? read this back; E actual banked evidence. R only after Voice and Audience are present, an NS is set and the learner responds in the same colour, on the same page or usual mode.

Evidence record

The Evidence Sheet is a staff record and book-task reference. It contains no prefilled learner answers. Record a scribed response faithfully and check it back privately. Offer to the Communication portfolio. Any accredited-unit mapping requires staff confirmation from actual evidence.

Continuity

Spring 1 Weeks 1–5 are formative and Week 6 is assessing under the owner’s calendar. This pack introduces recognition of hard feelings during change; later work names feelings, explores support and practises strategies. Do not claim later independence or a real-life coping performance from this fictional task.

Scope

This return contains BUILD RSHE Spring 1 Week 1 only. GROW PSHE Spring 1 Week 1 follows after Downloaded, before the other Week 1 lines and then Week 2. No later RSE content is included.
