Staff answers and teaching notes

Outcome and boundaries

Recognise that change can feel hard (Children's MH Week).

Teach the link between a fictional changed plan and a stated hard feeling. Do not ask about personal experience, family change or health. The source’s MH Week label is not an event-date claim. Generic scenario work replaces named resources; no therapeutic or accreditation claim is made.

Starter and model

New plan: art later. Old plan model: art first. A changes the time/order of art. Cross is stated, not inferred from a face. A person’s feeling can be acknowledged without judging it. The model makes the link explicit.

Guided B

The room changes. Unsure is stated; the learner does not know where to sit. A useful link is “The room is new. They feel unsure because they do not know where to sit.” Asking an adult to show the seat fits the uncertainty. The adult must not assume how every person would feel.

C and private hinge

Main key B: the two people feel differently, keen and unsure. Both responses are possible. Parallel key A: change may feel hard, supported by cross in A. Use the bank, starter and model throughout. If the learner chooses the other answer, point to the quotes, re-model and check privately. No public hands-up check.

Help choices

For B, choice A asking where to sit fits the story. For the general step, choice A asking for a first step fits. Guessing may leave the uncertainty unresolved. Help may clarify the plan without making the feeling disappear. Accept an equivalent safe step such as asking to see the plan or taking an agreed pause with support.

Individual evidence and support

D possible response

“The order changed. They will read first, then draw. They feel cross because they liked the old order. Change can feel hard. They could ask an adult to show the first step.” A short equivalent, pointing to the correct clue with a scribe, or an aided reply can show the same thinking.

Recognition comes first

Secure recognition links the change with its stated hard feeling. A help step extends learning. Do not require a coping performance or a claim that the feeling is gone. Naming cross without linking it to change is partial. A pass or no collected response is unobserved, not failure.

Feedback

Give one precise next step: show what changed; find the feeling clue; link the two. Use the frame and visible model for the reply. Keep first thinking and revision separate. Record usual access separately from content cues. All routes retain Level 2 supports.

Scaffolds for each task

Starter: first/later, “Art is ...”, old-plan model. Model check: time/cross/plan, change-and-feeling frame, A model. B: room/unsure/seat, same frame, A model. Hinge: same/different/keen/unsure, “They can feel ...”, one-person model. Help: ask/adult/first step, “They could ask ...”, adult-plan model. D: order/read/draw/cross/help, same frame, A model. Review/exit: hard/cross/unsure/ask/help, change-and-kind-step frame and A model.

Scribe and private route

Read neutrally, wait, capture exact selections, read back and allow correction. No public response is required. Help request can be a private point to HELP. Before teaching, confirm an available trusted adult and the school’s route. If a concern is shared, listen, avoid probing and follow normal procedures. Do not promise secrecy.

Access marking and lesson limits

Common errors to correct

“Change is always bad”: use C’s keen response. “All people feel the same”: use the two quotes in C. “Hard feelings mean failure”: acknowledge the feeling and offer a clear next step. “Help must fix it at once”: support can help while feelings take time. Accept mixed feelings when the learner explains a possibility, while distinguishing what the story actually says.

Route decisions

Supported: reduce reading at one time, offer choices and record help. Independent: learner chooses the link using retained aids. Aspire: give a reason and compare C’s responses. No route adds personal disclosure. Shorter writing, pointing or exact scribing preserves the same outcome.

Evidence record

Keep only actual work. E means evidence banked. R follows Voice, Audience, NS and a recorded response. Offer to the Communication portfolio. Staff confirm any accredited mapping. The lesson is formative; Week 6 assesses under the owner’s six-week calendar.

Thread and careers lines

SMSC S values feelings and voice; So supports respectful help. British Values IL respects a pass and choice of response mode; MR respects privacy and different feelings. Do not claim other threads. Where this leads: coping with a changed plan and asking for clear steps in learning or future work.

Delivery scope

40 minutes in 12, 13 and 15-minute chunks with resets inside the total. No practical activity, external media or live link. Only BUILD RSHE Spring 1 Week 1 is authored here. Next is GROW PSHE Spring 1 Week 1 after Downloaded.
