

Knowledge Organiser (GROW W3): Why people moved and what changed

Humanities Aut 1 · 2026–27 · Workbook outcome: Explain a cause and a consequence of migration.

Key Word	Definition
cause	The diagram above has three boxes joined by arrows: cause, then event, then consequence. The cause sits before the event in time. The consequence sits after it. The arrows carry the joining word so.
event	The diagram above has three boxes joined by arrows: cause, then event, then consequence. The cause sits before the event in time. The consequence sits after it. The arrows carry the joining word so.
consequence	The diagram above has three boxes joined by arrows: cause, then event, then consequence. The cause sits before the event in time. The consequence sits after it. The arrows carry the joining word so.
Watch me do it:	Watch me do it: I take a statement card. It says the government advertised jobs in the Caribbean. Is that before or after 1948? Before. Does it help explain why people came? Yes. So it is a cause. I put it in the cause pile and read its locator out loud. I ask before or after first. Then I ask does it explain. Then I sort.
Push	The diagram above sorts causes into two kinds. Push causes are on the left: things that make it hard to stay. Pull causes are on the right: things that make a new place attractive. The arrow in the middle is the move itself.
Pull	The diagram above sorts causes into two kinds. Push causes are on the left: things that make it hard to stay. Pull causes are on the right: things that make a new place attractive. The arrow in the middle is the move itself.
Fixing it together:	Fixing it together: ask which place the cause is about. If it is about the place people left, it is a push. If it is about the place they went to, it is a pull. "Jobs advertised in Britain" is about Britain, so it goes in the pull box.

Key Facts

- Last week we read a source. This week we use sources to explain why people moved and what changed.
- Last week's timeline showed order. Order is not cause. Today we add the evidence that turns order into explanation.

Arrival Task

What we already know about cause and consequence

1) Last week we read a source. This week we use sources to explain why people moved and what changed.

2) Last week's timeline showed order. Order is not cause. Today we add the evidence that turns order into explanation.

Why is a list not an explanation?

Here are two answers to the question: why did people come to Britain from the Caribbean in 1948? Answer A: “There was a war. There were jobs. There was a ship.” Answer B: “After the war, Britain was short of workers, so it invited people from the Caribbean to come and fill jobs, and one consequence was that new communities grew in British cities.”

Try it in your head: think of a time a lesson was moved to a different room. What caused it? What happened as a result? Say it with the word so in the middle. That is a cause-and-consequence chain.

We Do 1: Sort three cards. Match one to its event.

Card 1: in August 1972 the ruler of Uganda ordered people of Asian heritage to leave within ninety days.

Card 2: shops and businesses run by families from Uganda opened in towns such as Leicester during the 1970s.

Card 3: Britain's hospitals and transport services recruited workers from the Caribbean in the 1950s.

We Do 2: Match causes to consequences together

We build one chain on the board first. Nobody writes yet. Everyone puts one cause card on a whiteboard, marked push or pull. Then we show them all at once. Then we agree the chain. The event for this chain is 1972. The consequence is done: shops and businesses opened in towns like Leicester. Your job is to match a cause. Write the card and its locator, not a describing word.

Scaffolding – Stretch

Word Bank

cause, event, consequence, Watch me do it:, Push, Pull, Fixing it together:, Space, Voice, Audience, Influence

Your route

All cards sorted and matched. One chain with a push and a pull. Then a judgement: which cause mattered more, and what on the cards supports that? A judgement that names a limit is still a judgement.

Sentence frames

"Who ... what they do ... so that ..." | "... because ..."

Reference Zone — keep this beside your work

The model

Watch me do it: I take a statement card. It says the government advertised jobs in the Caribbean. Is that before or after 1948? Before. Does it help explain why people came? Yes. So it is a cause. I put it in the cause pile and read its locator out loud. I ask before or after first. Then I ask does it explain. Then I sort.

Fixing it together: ask which place the cause is about. If it is about the place people left, it is a push. If it is about the place they went to, it is a pull. "Jobs advertised in Britain" is about Britain, so it goes in the pull box.

Check yourself

- Check yourself: is every card in a pile, cause or consequence?
- Check yourself: does every cause match an event card?
- Check yourself: does your chain sentence use the word so at each arrow?

From the lesson sheet

Why people moved and what changed

SoW: 'GROW Weekly - Autumn'!C48 — "Explain a cause and a consequence of migration."

Learning objective: I can sort causes from consequences of migration, match a cause to its event, and explain one chain with a source.

No personal or family history is required. Every task can be completed with the supplied statement cards and their printed locators.

The cause and consequence row

Card → cause or consequence → the event it belongs to. Each row needs its locator.

The first row is done for you, from the sort we built together. It is in italics so you know it is not yours. Fill in as many of the rows below it as you can.

Independent Work – Stretch

All cards sorted, a push-and-pull chain, and a judgement with a reason.

All cards sorted and matched. One chain with a push and a pull. Then a judgement: which cause mattered more, and what on the cards supports that? A judgement that names a limit is still a judgement.

Card (with locator)	Cause or consequence?	Which event, 1948 or 1972?
<i>the government advertised jobs in the Caribbean</i>	<i>cause (pull)</i>	<i>1948</i>

Choose a route

1. I chose my own route.
2. My chain is in my own words.
3. Any adult help is written on the record.

5 · Learner confirmation

I confirm this is my own work.

Learner name (print)	Signature
Date	

Exit Ticket – Stretch

1) Read your chain to a partner or to an adult. The listener says back the cause they heard, in their own words.

2) Did the listener hear a consequence where you meant a cause? Then change the join. That change is your influence. It belongs to you, not to them.

3) Next week you will look further back, at people from many backgrounds who have lived in Britain for centuries. Keep your chain. It will help you then.

Lundy Loop — this lesson

SPACE stays available. VOICE is received. AUDIENCE names back exactly. INFLUENCE changes one real next action.

Space	is room to take part;
Voice	VOICE is received.
Audience	AUDIENCE names back exactly.
Influence	INFLUENCE changes one real next action.
