Safe dish preparation knowledge organiser

Design and Technology LAUNCH Spring 1 Week 2 Thursday 14 January 2027 P1 Year A

Weekly outcome verbatim: FOODWISE: prepare a 2-3 step dish safely.

I can follow my checked plan to prepare a simple dish and show safe working.

Today I can

[ ] I can complete the agreed preparation steps with the support I need.

[ ] I can show hygiene and safe tool use before, during and after making.

[ ] I can keep an honest record of my finished plate and the support used.

Our three step model

Prepare the washed produce using agreed tools or adult-prepared vegetables. Mash ready-to-eat beans and mix the filling. Fill and fold the wrap and serve the sides.

A safe change

If a label, ingredient, tool or support need changes, stop and ask the adult to check it. A familiar package is not permission to use it.

Evidence to keep

Keep a record of the actual dish, safety actions, support and real changes. Record a food-only plate photo privately, or leave photo status pending. A teaching picture or simulation does not prove preparation.

Resilience and change

A useful adjustment keeps the meal possible and safe. Ask for help, prepared ingredients or another approved route when needed.

In your book. Rehearse in any language. No tasting is compulsory. Share personal health information privately with the adult.
