Teacher and cover plan

Design and Technology LAUNCH Spring 1 Week 2 Thursday 14 January 2027 P1 Year A

Prepare our planned dish safely

Weekly outcome verbatim: FOODWISE: prepare a 2-3 step dish safely.

LAUNCH Weekly Spring row 198. Year A. Resilience & Change. One 40-minute lesson for a small group aged 14–16.

Use the pupil’s Week 1 plan to make the agreed cold dish. Keep the actual plate record and observed process. A food-only photo is taken only through the approved private process. Preparation evidence is never invented.

Before the lesson

Before ingredients are issued, use the school allergy policy and individual healthcare/access records, complete the blank teacher note privately, check every actual label and substitution, and confirm trained supervision, emergency arrangements, handwashing, safe tools, clean preparation and chilled storage. Unknown or incomplete checks mean HOLD. Do not infer no allergies from a blank record.

Prepare clean stations and portioned ingredients. Adult opens tins. A non-specialist cover adult uses washed prepared vegetables and fork assembly unless approved and competent to supervise sharp tools. Set up the agreed tools, prepared vegetable option and safe storage. Keep the device away from food stations. Read the Step Card, Safety Check, Allergy Note, No Kitchen Fallback and Photo Record.

Timing

Stage	Minutes
Arrival	5
Starter	3
I do	5
We do	7
We do 2	5
Independent	8
Review	4
Exit	3

Total 40 minutes. Supporting pictures, hinge checks and tier choices fit within these stages. Calm pauses use tools down and food protected. Clear progressively to leave enough time for safe cleaning.

The checked plan and sequence

Design and Technology LAUNCH Spring 1 Week 2 Thursday 14 January 2027 P1 Year A

Arrival 5 minutes

Say and do: Complete the private records, label and facilities checks before the lesson and keep the allergy note blank in the public master. Read each pupil’s plan and confirm any substitution. Give GO only for a cleared practical; unknown checks mean HOLD. Pupils wash and dry hands. Use the cold assembly fallback if safe facilities are approved, otherwise simulate. No one must disclose personal health information to the group.

Check and response: Ask: What must happen before ingredients are issued? Expect the adult’s completed safety and allergy checks, then GO. An unchecked or blank note is HOLD, not clearance.

Starter 3 minutes

Say and do: Use the original model picture strip and the step card. State that the illustrations are teaching models, not photographs of pupil work or proof of quantities. The written plan controls actual amounts. Use only cooked beans labelled ready to eat. Never use dry or merely soaked beans in this cold dish.

Check and response: Correct order is prepare, mix, assemble. If a pupil cannot explain the order, use one picture at a time and repeat the first step together.

Demonstration and guided preparation

Design and Technology LAUNCH Spring 1 Week 2 Thursday 14 January 2027 P1 Year A

I do 5 minutes

Say and do: On a clean station demonstrate the locally approved grater or knife method, keeping fingers away from cutting surfaces and the board stable. Adult opens tins and removes sharp lids in advance. Show a fork mash and about 20 g from the single 60 g yoghurt portion. Keep the rest chilled for the side. Model clean utensils, stop-and-ask, and the no-tool route. Do not require tasting.

Check and response: Ask: Which beans, and who opens a tin? Expect cooked ready-to-eat beans and the adult. If not secure, use prepared ingredients and recheck before pupil tool use.

We do 7 minutes

Say and do: Supervise the pupil’s approved tool action closely or provide washed prepared vegetables. The pupil may direct adult handling. Issue only needed portions and keep other chilled ingredients in storage. Prompt one action, wait, then fade support. Place used equipment in the agreed cleaning area as tasks finish. Check the private plan if a food changes.

Check and response: Look for actual handwashing, clean surface, safe approved tool use or pupil-directed adult handling. Record what the pupil did and the adult did. Do not infer a cutting skill from an assembled wrap.

Hinge and completing the dish

Design and Technology LAUNCH Spring 1 Week 2 Thursday 14 January 2027 P1 Year A

We do 2 5 minutes

Say and do: Run the short hinge within the practical. Correct answer is stop for the adult’s label check against the individual plan. A familiar-looking pot or plant alternative is not clearance. If any pupil misses this, stop their food handling and reteach before restart. Parallel check: a utensil touches an unapproved food; stop, isolate it and get a clean approved utensil after the adult check. Pupils then begin the fork mash with the agreed ingredients.

Check and response: All pupils show or say stop-and-check before continuing. The adult resolves the actual concern; a quiz answer alone does not clear an ingredient.

Independent 8 minutes

Say and do: Pupils complete steps 2 and 3 under ongoing supervision. Independent is the timetable stage, not unsupervised tool use. Keep the Week 1 plan beside the station. Accept support and pupil-directed adult handling, recorded honestly. Check one 60 g yoghurt allocation, actual portion choices and any approved substitution. Support should fade only when safe. Pause with tools down and food protected whenever needed.

Check and response: Look for the actual agreed dish, clean handling and safe responses. If incomplete at the stop point, store or dispose safely and record the true stage. Do not rush sharp tool work to finish.

Plate evidence and safe closure

Design and Technology LAUNCH Spring 1 Week 2 Thursday 14 January 2027 P1 Year A

Review 4 minutes

Say and do: Check the dish and the storage or serving decision first. Stop food handling before an adult operates the approved device. Frame food only and keep capture optional. The adult must verify the private evidence copy has no identifying content or metadata; otherwise leave photo pending. Return utensils, clean surfaces, put waste away and wash hands. Start clearing progressively earlier if the group needs longer.

Check and response: A photo shows the plate, not safe preparation. Combine it with brief adult observations of actual hygiene, tool use and support. Tasting is optional and any uneaten food follows the adult’s safe decision.

Exit 3 minutes

Say and do: Use the evidence sheet and photo record. Retain actual dish, any change, support, observed safe actions, plate photo location or pending status, and the storage decision. A written or drawn plate record can supplement a missing photo, but never label it as a photo. Keep Week 3 evaluation for the next return. Completed private allergy notes and photographs stay out of published teaching files.

Check and response: Keep preparation, adult handling, simulation and photo status separate. Let the pupil correct the record. Record an unfinished or unsafe attempt honestly and plan a supported next opportunity.

If time or facilities run out

Stop tools and food handling safely. The adult decides storage or disposal. Record the true stage and any photo pending. Use simulation only with that label; do not claim the completed dish or skill.

Access support and alternatives

Design and Technology LAUNCH Spring 1 Week 2 Thursday 14 January 2027 P1 Year A

Cognition and Learning

Show one picture and step at a time. Model the first action, then fade. Keep quantities visible. Check understanding before any tool use. Offer a spoken sequence and repeated hygiene prompts.

Communication and Interaction

Accept pointing, speech, signing or pupil-directed adult handling. Ask one short question and allow thinking time. Read the evidence words back for confirmation.

SEMH

Offer a calm pause with tools down and food protected. Agree a return cue. No public performance, compulsory tasting, home-finance talk or personal health disclosure. Use a private adult check.

Sensory and Physical

Offer prepared vegetables, an approved adapted tool or pupil-directed adult handling. No touching or tasting is compulsory. Record the actual role rather than claiming an unperformed skill.

EAL

Plan and rehearse in any language. Pair the picture with the spoken action and quantity. Confirm meaning before tools are issued. Read the pupil’s recorded explanation back.

Materials free fallback

With no safe food facilities, food or equipment, rehearse with empty hands or pictures. The pupil explains or directs the three steps and names a safety action at each point. Record this as planning or simulation, not preparation. Mark the practical and any plate photo pending. Rebook the practical when the adult can meet all safety requirements.

Where this leads

Food preparation teams use clear methods, safe tools and accurate records. They adapt a plan while keeping the person eating the food safe.
