Teacher and cover plan

LAUNCH Design and Technology Spring 1 Week 3 Thursday 21 January 2027 P1 Year A Resilience and Change

Evaluate our food design

Weekly outcome verbatim: FOODWISE: evaluate taste, cost and nutrition.

LAUNCH Weekly Spring row 199. Year A. Resilience & Change. Small group aged 14 to 16.

The lesson completes the food design make evaluate cycle. Use actual records from the first two weeks. No food or kitchen is required.

Prepare

Bring the actual Week 1 plan, known ingredient-use prices, Week 2 making notes and any checked food-only photo. Keep private images in the private evidence record; do not project identifying details. Provide books, a calculator if available and the generic cards.

Safety boundary

No food is needed today. Do not bring or taste the Week 2 food a week later. Use the actual Week 2 notes or a checked food-only photo. If taste was not tried and recorded, write taste not assessed. A photo cannot prove taste. Any fresh tasting would be a separate, newly cleared food activity and is not required here.

Timing

Arrival 5; Starter 3; I do 5; We do 7; We do 2 5; Independent 8; Review 4; Exit 3. Cards, models and pauses fit within these stages.

Catch up

With no prior food record, make an honest gap record. Review the clearly labelled adult cost model for practice and keep the pupil’s actual dish evaluation pending. With no paper or device, give an oral or signed review and have an adult record exact confirmed words when possible. Mark transcription pending until it exists. No kitchen, food or tasting is needed.

Arrival and starter

LAUNCH Design and Technology Spring 1 Week 3 Thursday 21 January 2027 P1 Year A Resilience and Change

Arrival 5 minutes

Say and do: State the no-old-food rule before opening records. Check what actually exists: plan, ingredient-use prices, preparation note and optional food-only photo. Keep identifying images private and do not project them. Missing items stay missing. Use a quiet settling minute inside this stage.

Check and response: Ask: Do we need last week’s food? No. We use records. If an item is absent, note the gap rather than replacing it with a generated model.

Starter 3 minutes

Say and do: Use adult examples only: a recorded note says mild flavour; a photo shows a folded wrap; no taste note means taste not assessed. Let pupils point, speak or sign the category. Do not invite guesses about taste from a picture.

Check and response: A visible folded edge is appearance. A recorded flavour is taste. A photo alone cannot prove flavour.

Model and shared review

LAUNCH Design and Technology Spring 1 Week 3 Thursday 21 January 2027 P1 Year A Resilience and Change

I do 5 minutes

Say and do: Model with an adult example: I have only the model cost card, so I cannot claim a pupil’s taste. Add 35+30+15+10+20+30=140p. Say £1.40 is already per portion. Do not divide it again. Show the two-portion batch example separately. Fade by leaving the last addition for pupils.

Check and response: Ask: Is 140p already one portion or a whole batch of unknown size? It is the one-portion model. A model review never replaces the pupil’s actual evidence.

We do 7 minutes

Say and do: Work through the food-group table and explain balance across a day or week. Check the apple-to-pear example: 140 minus 30 plus 35 is 145p. Distinguish ingredient-use prices from whole packs. Explain 280p divided by two actual portions gives 140p each. Use an actual approved substitution only if its amount and price are known.

Check and response: Model total £1.40, budget left 60p. Pear version £1.45, 55p left. A two-portion £2.80 batch is £1.40 per portion. No invented amount is added to a pupil’s record.

Hinge and own evaluation

LAUNCH Design and Technology Spring 1 Week 3 Thursday 21 January 2027 P1 Year A Resilience and Change

We do 2 5 minutes

Say and do: Correct hinge answer is taste not assessed. If any pupil chooses another answer, stop the claim, separate the evidence types and reteach. Parallel check: a £2.80 batch made two portions. Cost per portion is £1.40, not £2.80 or 70p. A quiz answer does not supply missing evidence.

Check and response: Move to the pupil review after they can keep a photo claim separate from a taste claim. Use the Supported route and calculator for an uncertain cost check.

Independent 8 minutes

Say and do: Use one route and the evaluation prompts. The pupil’s own review should point to the actual record. If taste is unassessed, write that and continue with other headings. Ask what one real feature or constraint suggests a change. Predictions about the next version are labelled predictions. Scribe exact pupil words and read them back. Use a quiet organisation minute inside this stage.

Check and response: Look for a checked cost per portion, one food-group comment, honest taste status and one improvement linked to a reason. Record actual support and any evidence still pending.

Core evidence

The pupil’s own review states the dish and actual source, taste assessed from the recorded Week 2 note or taste not assessed, appearance if evidenced, checked cost per portion, food-group comment and one improvement with a reason. Keep the date, evidence location and actual support. Missing evidence and simulation remain clearly marked.

Review and exit

LAUNCH Design and Technology Spring 1 Week 3 Thursday 21 January 2027 P1 Year A Resilience and Change

Review 4 minutes

Say and do: Offer an opt-in partner check or a private adult review. A useful comment asks which evidence supports a claim and how the change might help. The pupil decides and records a correction. Keep sensory judgements neutral and personal. Tidy and store actual records in the final minute.

Check and response: Accept a truthful limited review. Do not change taste not assessed into a score or invent a successful dish.

Exit 3 minutes

Say and do: Keep the completed review with the plan and actual making evidence. Record one next step and any gap. The next strand uses textiles. Do not claim that a proposed food change has already been made or tasted.

Check and response: Retain the pupil’s own reason, date, evidence location and support. A spoken or signed review can be confirmed to a scribe.

Access and adult support

LAUNCH Design and Technology Spring 1 Week 3 Thursday 21 January 2027 P1 Year A Resilience and Change

Cognition and Learning

Show one review heading at a time. Read the actual record aloud. Model the first cost addition, then fade. Keep all amounts in pence before converting to pounds. Use a calculator and a food-group list.

Communication and Interaction

Accept pointing, speech, signing, drawing or pupil-directed scribing. Ask one short question and allow thinking time. Read the review back so the pupil can confirm or correct it.

SEMH

Keep food preferences and evidence private. No compulsory tasting, body or weight talk, home-finance questions or public rankings. Offer a calm pause and an agreed return cue. Keep feedback about the design.

Sensory and Physical

No food contact or tasting is required. Offer a large-print view and verbal description of any actual photo. A pupil who did not taste records taste not assessed and can still review cost, appearance and food groups.

EAL

Plan and explain in any language. Pair each review word with a short example. Read money and quantities aloud. Confirm the meaning of the pupil’s own words before scribing or translation.

Prompt ladder

Point to the place or instruction. Ask a short question. Rephrase. Offer a scaffold or choice. Model the first step only, then return the task.

TA focus

I do: point to the actual source and fade the addition model. We do: ask a short evidence question and wait. Independent: scribe confirmed pupil words and record support.

Where this leads

Food designers and catering teams compare evidence, cost and nutrition before changing a recipe. An honest review helps the next person make a better version.
