Sequence and evidence guide

LAUNCH Design and Technology Spring 1 Week 3 Thursday 21 January 2027 P1 Year A Resilience and Change

Thursday 21 January 2027 P1. LAUNCH Design and Technology Spring 1 Week 3. Year A.

Food weeks use a design make evaluate cycle. Week 1 planned a balanced meal on a budget. Week 2 prepared the agreed dish with safety checks. This lesson reviews actual evidence and chooses one improvement.

Books and actual evidence first

The pupil’s own review states the dish and actual source, taste assessed from the recorded Week 2 note or taste not assessed, appearance if evidenced, checked cost per portion, food-group comment and one improvement with a reason. Keep the date, evidence location and actual support. Missing evidence and simulation remain clearly marked.

Food and taste boundary

No food is needed today. Do not bring or taste the Week 2 food a week later. Use the actual Week 2 notes or a checked food-only photo. If taste was not tried and recorded, write taste not assessed. A photo cannot prove taste. Any fresh tasting would be a separate, newly cleared food activity and is not required here.

Portable resources

Use the HTML for stage navigation, evidence sorting, a cost check, routes and optional typing. Use the PDF resources for print. The paired editable documents contain the same teaching content. Keep assets beside the HTML.

Materials free route

With no prior food record, make an honest gap record. Review the clearly labelled adult cost model for practice and keep the pupil’s actual dish evaluation pending. With no paper or device, give an oral or signed review and have an adult record exact confirmed words when possible. Mark transcription pending until it exists. No kitchen, food or tasting is needed.

Sources and review boundaries

LAUNCH Design and Technology Spring 1 Week 3 Thursday 21 January 2027 P1 Year A Resilience and Change

Price model

Week 1 model prices are invented for the stated amounts used by one person. They are not whole-pack shopping prices. The 60 g yoghurt is counted once, split as about 20 g in the filling and 40 g alongside. Use the pupil's actual approved ingredient amounts and substitutions. Unknown costs stay unknown.

Nutrition pattern

Balance is built across the day or week. Each meal does not need exact plate sections. Use the actual dish and amounts in your review. These example portions do not meet every person's needs. Choose water as a drink. No calorie counting, body or weight discussion is needed.

No invented outcomes

Adult examples are labelled. Keep the real pupil's recorded taste status, actual dish, work stage and support. A missing photo can remain pending. Do not turn a generated picture or adult model into pupil evidence.

Reading and access

Read one heading at a time. Accept spoken, signed or pupil-directed responses and confirm scribing. Use one tier route. Plan in any language.

Next strand

Weeks 4 to 6 use textiles: choose materials and a technique for a purpose, measure and join, then finish and evaluate the actual item. No future work is claimed in this food record.
