Finishing and evaluation knowledge organiser

Design and Technology LAUNCH Spring 1 Week 6 Thursday 11 February 2027 P1 Year A

Weekly outcome verbatim: TEXTILES: finish and evaluate a textile product.

This is the assessing week.

I can finish my item safely, test its purpose and explain what the evidence shows.

Today I can

[ ] I can complete or direct an agreed finishing action and record the help used.

[ ] I can test the pouch against its purpose and give my own evidence-based view.

[ ] I can check the six weekly outcomes honestly and choose a next step.

Finish then test

Secure the agreed loose ends, trim only approved loose tails, count and return tools, and check for sharp parts. Test only when the actual item is cleared and any adhesive has fully cured.

Our purpose

A small reusable pouch for three paper prompt cards, each 60 mm by 80 mm. The top stays open. It should hold the cards upright, have joined sides and bottom, contain no loose sharp parts and be comfortable to handle.

Evidence and my view

A prediction says what may happen. A test result records what actually happened. My evaluation uses that result to explain what worked and one useful improvement.

Six weekly outcomes

Use the Evidence Sheet grid with real work. Choose Shown, More to do or Not yet seen and add a date, location and comment. A tick is weekly evidence, not an award decision.

In your book. Rehearse in any language. Point, speak, sign or direct an adult where needed. Keep actual help and unfinished work visible.

The card pouch purpose brief

Design and Technology LAUNCH Spring 1 Week 6 Thursday 11 February 2027 P1 Year A

Use this invented brief with your actual Week 4 design and Week 5 work. Any approved change must be recorded; the class model is not a pupil result.

A useful small item

A small reusable pouch for three paper prompt cards, each 60 mm by 80 mm. The top stays open. It should hold the cards upright, have joined sides and bottom, contain no loose sharp parts and be comfortable to handle.

The default making plan

Default model: two fabric pieces, each 100 mm wide by 120 mm high. A seam line is 10 mm inside the left, right and bottom edges. Leave the top open. Default join is hand running stitch. Use each pupil’s actual approved design and any recorded change.

Feature	Default plan
Fabric pieces	Two pieces each 100 mm by 120 mm
Joining line	10 mm inside left right and bottom edges
Opening	Top stays open with no fastening required
Cards for the test	Three paper cards each 60 mm by 80 mm

What we will test

Do three actual cards fit without force? Do joined edges hold during a gentle upright lift over the table? Are loose ends secure, sharp parts removed and handling comfortable?

Your record

In your book: my actual fabric and join ___. A real approved change ___. Where my design is kept ___. What remains unfinished ___.

A drawing or prediction does not prove the item was made or tested. Keep gaps and support visible.

Safe finishing card

Design and Technology LAUNCH Spring 1 Week 6 Thursday 11 February 2027 P1 Year A

Use the actual item and agreed method. The adult checks and supervises tools. Finish only what can be done safely in the lesson.

1 Check

Put tools down and compare the actual item with the design. The adult checks that the fabric, thread and any bonding route are suitable. Count and control all needles before work.

2 Finish

With the agreed support, secure loose thread ends. For a hand-stitch end, take a small stitch through both layers on the back. Leave a loop before pulling tight. Pass the needle through the loop and pull snug. Repeat once. Trim only the loose tail with agreed scissors. Do not cut the seam or fabric.

3 Clear and test

Return and count all needles and other tools. Check that no sharp parts remain in the item. Test only when it is safe. If adhesive was used, wait for its full labelled cure before testing.

An adhesive join

If the actual approved design used bonding, follow its real label and adult instructions. No cure time is invented. Keep strength and handling tests pending until the full labelled cure is complete.

Stop point

Put tools down if a needle is unaccounted for, the method changes or you need more help. For a missing or broken needle, stop and keep the area clear. The adult recovers and accounts for all parts and controls disposal. Do not release or test the pouch until all sharp parts are accounted for. Return every tool to the agreed container.

Your own words

I finished ___. I did ___. The adult did ___. A check still pending is ___.

No actual item or safe tools: use a model or oral sequence and label it simulation. Actual textile finishing stays pending.

Product test card

Design and Technology LAUNCH Spring 1 Week 6 Thursday 11 February 2027 P1 Year A

The adult clears the actual item before any test. Remove and count all needles. Wait for full labelled adhesive cure if bonding was used.

Fit

Place the actual three 60 mm by 80 mm paper cards into the pouch without forcing them.

Do all three fit? What did you see?

Upright hold

Hold the pouch upright and lift it gently over the table. Do not shake it or turn it upside down.

Do the joined sides and bottom hold during this gentle check?

Handling and finish

Look at edges and joins. Check handling only after the adult clears the item.

Are loose threads secured and sharp parts removed? Is it comfortable to handle?

Keep the actual result

In your book: test ___. What I actually did ___. What happened ___. What this shows about the purpose ___. Help used ___. If not tested, why it is pending ___.

Fair checks

Use the same three cards for the fit and upright check. Do not force them in, shake the item or turn it upside down. A gentle classroom check gives limited evidence, not a guarantee of long-term durability.

No product available

Say what you predict, and label it a prediction or simulation. Do not write a result as though the test happened.

My product evaluation

Design and Technology LAUNCH Spring 1 Week 6 Thursday 11 February 2027 P1 Year A

In your book, use your actual design, item and test record. You can speak, sign or direct an adult scribe. Check your words when they are read back.

My purpose and design

My pouch needs to ___. The material and technique I chose were ___. A real change I made was ___ because ___.

What my tests showed

The three cards ___. The upright hold test ___. The joined edges and handling ___. My evidence is ___. A test I have not yet completed is ___.

My own view

My item meets / partly meets / does not yet meet the purpose because ___. One feature that worked was ___, shown by ___. One limit was ___, shown by ___.

One improvement and next step

I would improve ___ because ___. My next practical step is ___. I need ___ support or materials. This improvement is planned / actually completed ___.

Keep the roles clear

I completed ___. I directed the adult to ___. Other help was ___. The record was read back and confirmed yes / not yet ___. My actual date and book page ___.

An adult model is not your evaluation. Unfinished work and an honest failed test can give useful evidence for your next step.

Finishing and evaluation evidence record

Design and Technology LAUNCH Spring 1 Week 6 Thursday 11 February 2027 P1 Year A

Outcome verbatim: TEXTILES: finish and evaluate a textile product.

assessing week. Actual date ___. Private pupil record or book page ___. Actual design and item location ___. Practical / directed handling / simulation ___.

Feature to record	Actual evidence or honest gap
Finishing action and real change	_____
Pupil actions and adult support	_____
Fit test with three actual cards	_____
Upright hold and joined edge result	_____
Handling and removal of sharp parts	_____
Pupil evaluation and one next step	_____

Pupil words

My item meets / partly meets / does not yet meet the purpose because ___. My evidence is ___. I would improve ___ because ___. Words read back and confirmed yes / not yet ___.

Use actual observations. Record an unfinished item or test honestly. A simulation leaves actual finishing and testing pending. The six weekly outcomes follow on page two.

Six weekly outcomes evidence grid

Design and Technology LAUNCH Spring 1 Week 6 Thursday 11 February 2027 P1 Year A

assessing week. Check each outcome against real work. Choose one status and add a date, evidence location and short comment. Keep pupil words and adult observations separate.

Wk	Weekly outcome verbatim	Tick one status	Date evidence and comment
1	FOODWISE: plan a balanced meal on a budget.	[ ] Shown [ ] More to do [ ] Not yet seen	Date/location ___ Comment/support ___
2	FOODWISE: prepare a 2-3 step dish safely.	[ ] Shown [ ] More to do [ ] Not yet seen	Date/location ___ Comment/support ___
3	FOODWISE: evaluate taste, cost and nutrition.	[ ] Shown [ ] More to do [ ] Not yet seen	Date/location ___ Comment/support ___
4	TEXTILES: choose fabric and technique for a purpose.	[ ] Shown [ ] More to do [ ] Not yet seen	Date/location ___ Comment/support ___
5	TEXTILES: measure, cut and join accurately.	[ ] Shown [ ] More to do [ ] Not yet seen	Date/location ___ Comment/support ___
6	TEXTILES: finish and evaluate a textile product.	[ ] Shown [ ] More to do [ ] Not yet seen	Date/location ___ Comment/support ___

A tick records evidence for this weekly outcome. It does not award a qualification. A gap is not a failure. Keep missing, simulated or unfinished work visible and agree a next step.

Review date ___. Pupil view confirmed ___. Adult checking role ___. Evidence still to collect ___.
