The card pouch purpose brief

Design and Technology LAUNCH Spring 1 Week 6 Thursday 11 February 2027 P1 Year A

Use this invented brief with your actual Week 4 design and Week 5 work. Any approved change must be recorded; the class model is not a pupil result.

A useful small item

A small reusable pouch for three paper prompt cards, each 60 mm by 80 mm. The top stays open. It should hold the cards upright, have joined sides and bottom, contain no loose sharp parts and be comfortable to handle.

The default making plan

Default model: two fabric pieces, each 100 mm wide by 120 mm high. A seam line is 10 mm inside the left, right and bottom edges. Leave the top open. Default join is hand running stitch. Use each pupil’s actual approved design and any recorded change.

Feature	Default plan
Fabric pieces	Two pieces each 100 mm by 120 mm
Joining line	10 mm inside left right and bottom edges
Opening	Top stays open with no fastening required
Cards for the test	Three paper cards each 60 mm by 80 mm

What we will test

Do three actual cards fit without force? Do joined edges hold during a gentle upright lift over the table? Are loose ends secure, sharp parts removed and handling comfortable?

Your record

In your book: my actual fabric and join ___. A real approved change ___. Where my design is kept ___. What remains unfinished ___.

A drawing or prediction does not prove the item was made or tested. Keep gaps and support visible.
