Teacher and cover planner

Wellbeing and resilience

Thursday 7 January 2027 · P4 · 40 minutes · Year A

LAUNCH · pair aged 14–16 · Spring 1 Week 1 · formative

Theme Resilience & Change. Six-week term; Week 6 assessing.

Thread tags: SMSC S/So (M/C none); British Values IL/MR (D/RL/T none).

Exact outcome

Wellbeing, resilience & mental health.

Source: owner brief, LAUNCH Weekly Spring row 148. Accepted Autumn 2 structure is a style reference only. The source workbook was not reopened.

Purpose and success

Explain three ideas without stigma, link a practical idea to a wheel area and choose one realistic change with support or fallback. Assess fictional learning only; personal wheel and plan remain private. A blank, pass or fictional alternative is valid.

Non specialist preparation

Read Staff Answers for definitions, case and checks. Print one tier per learner, Support Cards pages 1–2 once, glossary and staff Evidence Sheet. Prepare books/usual aids. Quietly pre-agree the pause signal, supervised route and staff response. Use fictional examples; no personal details are needed.

Where this leads

This helps me plan a manageable next step, adapt to change and ask for support in learning or future work.

Forty minute sequence

Phase	Minutes	Action
Arrival	0–4	Quiet set-up and discreet pause route.
Starter	4–6	Fictional everyone-has-mental-health claim.
I do	6–11	Three meanings, model and check.
We do and hinge	11–16	Private hinge and parallel; reset 15–16.
Practice	16–28	Wheel 16–22; one step 22–27; reset 27–28.
Learning evidence	28–34	Fictional learning/self-check; reset 33–34.
Review	34–38	One NS and own response.
Exit	38–40	Private learning check and help route.

All forty minutes include three one-minute resets: 15–16, 27–28 and 33–34. No public current-feeling check. Pair talk is optional.

Teaching and response routes

Arrival and starter

0–4: calm set-up, predict the lesson sequence and remind learners of the discreet supervised pause route. 4–6: use the fictional claim that everyone has mental health. Explain that this does not mean everyone has a mental health condition. No current-feelings question.

Model and guided check

6–11: teach the three definitions with the invented learner. Asking staff for support and adapting a plan can show resilience. Check one story link privately. 11–15: hinge B and parallel A if needed. 15–16: quiet reset. Keep the visible model and usual aids.

Private practice and learning

16–22: invite the private five-area wheel or fictional equivalent, blank or pass. 22–27: each learner chooses ONE realistic change; a change may make an existing helpful habit easier to keep, such as agreeing when or where it fits. 27–28 reset. 28–33: capture fictional explanation and learning self-check only. 33–34 reset. 34–38: one next step and learner response. 38–40: private learning exit and generic help route.

Supported

Use the same age-respectful five-domain wheel. Offer the word bank, two example choices, a sentence frame and a completed fictional example. Pointing, drawing, usual aid or exact scribe/readback valid. Choose one realistic step with support and record content prompts.

Independent

Use the glossary, wheel prompts, visible model and usual aids. Explain the fictional example, privately choose one realistic change or fictional equivalent, and identify needed support or a barrier. Record actual independent choices and any prompts honestly.

Aspire

Keep all normal aids. Evaluate two plausible steps for the invented learner, explain the more realistic choice, and adapt it for a barrier without blaming the learner. Still choose only one step. Extra personal disclosure, more changes or longer writing are not required.

Worked model and fade

For the invented learner: during the next agreed break, try a short quiet making activity. Ask staff what materials are already available. If materials are not available, choose a quiet drawing or reading option. Review whether the step was useful at a later agreed check-in. The quiet activity is the one chosen change; asking staff about materials is support for that step, not a second goal. Show the model first, then leave a choice and reason to the learner. Retain glossary, frames, wheel prompts and normal aids.

TA focus

I do: reinforce meanings without labelling ordinary feelings as a condition. We do: offer fictional choices and a frame. Independent: observe fictional explanations and record prompts, acknowledge pause signal, maintain supervision and route any disclosure through safeguarding. Personal card support is only by agreement.

Aids for each task

Each task keeps a short word bank, sentence starter and visible model. The separate tier packs adapt scaffolding while retaining the same outcome, five areas, one change and learning self-check.

Starter claim

Words: everyone, health, thoughts, feelings

Start: Everyone has mental health because ... .

Model: Mental health is part of everyone's health.

Model check

Words: wellbeing, resilience, support, change

Start: The learner shows resilience by ... .

Model: The learner asks for help and adapts the plan.

Private hinge

Words: pause, adapt, support, safe

Start: A helpful response could be ... because ... .

Model: A helpful response could be asking staff because the learner needs a clearer first step.

Wheel reflection

Words: sleep, movement, people, purpose, downtime

Start: For the invented learner, ... could support ... .

Model: A safe check-in could support the people area.

One realistic change

Words: one step, cue, support, barrier, review

Start: They could try ... at ... . If ... , they could ... .

Model: They could choose a quiet activity at an agreed break. If materials are missing, they could choose another quiet activity.

Learning self-check

Words: explain, example, prompt, help

Start: I can explain ... using the example ... .

Model: I can explain resilience using the learner's supported plan change.

Feedback and exit

Words: next step, response, adult, private

Start: A next step in the story could be ... .

Model: A next step in the story could be checking the plan with trusted school staff.

Prompt ladder

1 Point to the place or instruction. 2 Ask a short private question. 3 Rephrase. 4 Provide a scaffold or choice. 5 Model the first step only, then return the task. Allow processing time. Record actual content prompts separately from usual reading, language and communication access.

Checks and planned access

Three meanings

Wellbeing: how a person is doing daily, with support and things that matter. Mental health: part of everyone's health, including thoughts, feelings and coping or getting help; this is not the same as having a condition. Resilience: adapting after a setback, with rest, support or a changed plan; never accepting harm.

Check after the model

Ask where the invented learner adapts or uses support. Accept a defensible link in usual mode, with exact scribe/readback if needed. Use only the story.

Main hinge and decision

B: pause, adapt or ask for safe support. A wrongly requires coping alone. Check privately with a reason. If unclear, re-model and use the parallel. Pass is valid.

Parallel hinge

A: a wheel can prompt reflection and one possible step. B wrongly claims that its shape can diagnose a condition. No total, target or health judgement comes from this wheel.

Cognition and Learning

Explicit short definitions, worked example, glossary, visible model, task frames and one chosen step. Flexible grouping for a pair; reduced written load and extra processing time.

Communication and Interaction

Choice, wait time, familiar aid, pointing/drawing, exact scribe and readback. Pair discussion optional; no requirement for speech or eye contact.

SEMH

Predictable content, third-person class questions, privacy for wheel/action plan, blank/pass/fictional alternative, pre-agreed discreet step-out and supported return. No comparison or personal questioning.

Sensory/Physical

Usual accessible print/seating/communication access and quiet resets. Movement is a planning option suited to the person, never an imposed activity or physical test.

EAL

Plan in any language. Explain wellbeing, resilience and purpose with brief examples. Usual language support can convey the learner's own chosen words.

Optional private story checks

F: Which word fits asking for support? M: Which wheel areas link to the story, and why? H: Which step fits limited time or materials? Use private fictional checks only.

Misconceptions

Resilience can include rest, support and boundaries; it does not require never feeling upset or accepting harm. A small habit is not a guaranteed fix. The wheel has no diagnostic score and ordinary feelings alone do not establish a condition.

Lesson resource · CC BY-NC-SA 4.0: free for classroom use, share and adapt with credit, no resale

Private reflection and safe support

Wheel and one change

Support Cards page 1 is the five-sector wheel; page 2 is the private one-change plan. Sleep, Movement, People, Purpose and Downtime are prompts. There are no scores, required marks or right-shaped wheels. One realistic change per learner, not five goals. Fictional reflection, a blank or pass is equally valid. No required spending, exercise, sleep target, family contact or unsupported action.

Discreet step out

Before the lesson, quietly agree the familiar pause signal and supervised place/route with the learner. A pupil may show a pause card or use the usual aid without a public explanation. A staff member acknowledges and supports the agreed route; never send a learner off alone or remove supervision. Offer a neutral task and a supported return, or arrange a later private catch-up. Pass/step-out is not failure and does not require personal disclosure.

Generic help route

Support may come from a trusted adult, school staff, a family doctor or a suitable helpline. Ask trusted school staff for help to find an age-appropriate route. Seek help if a concern persists, worsens, affects everyday life or feels unsafe; you do not need a diagnosis first. If the first adult is unavailable or unhelpful, try another trusted adult through the agreed route. For immediate concern, get school staff straight away and use the school's urgent procedure.

Safeguarding and privacy

Any disclosure goes to the safeguarding lead through school procedure. Listen calmly, reassure, do not probe, investigate or promise secrecy. Follow urgent school procedures where needed. Keep actual concerns and identifying details out of the lesson pack, book tasks and shared learning evidence; use the school's separate safeguarding record. If a learner cannot identify a trusted adult, support them privately and do not press. Private wheels/plans are not collected, photographed, displayed or compared for assessment. Scribing a personal card is only by agreement; the learner keeps it.

Learning evidence

Staff Evidence Sheet records explanation of the three ideas, an appropriate fictional wheel-area link, a realistic fictional step with support/barrier, learning self-check if offered, usual mode/prompts, one NS and own response. No personal wheel ratings, plan details, health/family history, names or disclosures. Private personal change remains the learner's choice; fictional evidence is equally valid. Do not infer health status, improvement or diagnosis from learning performance.

Feedback and marking

VF verbal feedback; WS worked with support; I independent; NS next step in green; // self-edit; ? read this back to me; E actual evidence banked; R responded. R only when Voice and Audience are present, one NS is set and the pupil responds in the same colour, on the same page or usual mode. Offer to the Communication portfolio; staff confirm any mapping.

Book first and scope

Use books or usual aids for fictional explanations and responses. The optional wheel/one-change card is kept by the learner and is not learning evidence to collect. This lesson claims no full statutory coverage or accreditation completion. Week 1 only; no later lesson is authored.
