Teacher and cover planner

Online safety and media literacy

Thursday 21 January 2027 · P4 · 40 minutes · Year A

LAUNCH · pair aged 14–16 · Spring 1 Week 3 · formative

Theme Resilience & Change. Thread tags: SMSC S/So; British Values IL/MR.

Exact outcome

Online safety & media literacy (Safer Internet Day).

Purpose and success

Explain a privacy choice and why settings have limits.

Use source/context evidence to question an invented post.

Choose a safe response and support type if something goes wrong.

Non specialist preparation

Read Staff Answers. Print one tier pack per learner, Support Cards and glossary; keep the staff learning record separate. Prepare books or usual aids. All examples are invented and offline. No live account, device, login or online search is needed. Quietly agree the pause signal, supervised route and staff response.

Forty minute sequence

Phase	Minutes	Action
Arrival	0–4	Quiet set-up; preview invented offline cards and agreed supervised pause route.
Starter	4–6	Private fictional claim: many likes prove a post true.
I do	6–11	Model privacy controls, digital footprint and copied-post limit.
We do and hinge	11–16	Compare a crop with the full notice; private hinge and recheck;15–16 reset included.
Practice	16–28	16–22 chosen tier checks three invented posts;22–27 safe-response rehearsal and private checklist;27–28 reset included.
Learning evidence	28–34	Fictional privacy limit, evidence reason and safe-help response plus learning check;33–34 reset included.
Review	34–38	One next step and own response in usual mode.
Exit	38–40	Private fictional exit and generic help reminder.

The three one-minute resets at 15–16, 27–28 and 33–34 are included in forty minutes. Pair talk is optional and uses fictional examples only.

Teaching and response routes

Arrival and starter

0–4: calm set-up, preview the sequence and privately agree the supervised pause route. 4–6: present the fictional claim that many likes prove a post true. Invite a private choice and reason. Explain that popularity cannot establish truth. Privacy controls can help but cannot stop every copy or share.

Model and guided check

6–11: teach privacy settings and digital footprint using the invented profile choices. Compare the small audience and location-off options. 11–15: show an invented post, teach source, date and full context checks, then use the main hinge. Re-model and use the parallel if needed. 15–16: quiet reset.

Practice and learning

16–22: use the invented examples to identify a changed or misleading element and a check. 22–27: make a safe response plan for the third-person online mix-up. 27–28 reset. 28–33: record fictional learning, offer a private checklist and learning self-check. 33–34 reset. 34–38: one next step and learner response. 38–40: private exit and help route.

Supported

Use two clear choices, word bank, starter and visible fictional model. Point, draw, say or type; exact scribe and readback available. Identify a privacy limit, one missing clue and one safe help step.

Independent

Use the glossary, full invented source cards and normal aids. Explain a privacy choice and its limit, compare each post with its source and suggest a safe response with support.

Aspire

Keep usual aids. Explain how a crop or edit changes meaning, weigh evidence rather than appearance, and adapt the safe response if the first adult or reporting route is unavailable. Extra personal detail is never required.

Model and fade

The crop leaves out the date and the edited room picture cannot prove a cancellation. The learner can wait and ask staff for the current full notice. Many shares would not make either post reliable. Show the model first, then leave the next choice and reason to the learner. Keep glossary, frames and usual aids. Do not collect private checklist choices.

TA focus

Reinforce that a polished post or high share count does not prove a claim. Offer read-aloud, pointing, exact scribe and readback as normal access. Observe fictional explanations and record actual content prompts separately. Acknowledge the pause signal, keep supervision and route any disclosure to the safeguarding lead.

Aids for each task

Each task keeps a word bank, sentence starter and visible model. Choose one tier per learner. All tiers retain privacy, media checks, a safe response and a private checklist.

Starter claim

Words: likes, claim, proof, check

Start: Many likes do not prove ___ because ___.

Model: Many shares do not prove the activity is cancelled.

Privacy model

Words: audience, location, contact, copy

Start: A setting can limit ___ but ___.

Model: A setting can limit who sees a post, but a viewer may copy it.

Private hinge

Words: crop, date, context, source

Start: Before sharing, the learner could ___.

Model: They could ask staff to check the full current notice.

Post check

Words: claim, source, date, edit, evidence

Start: The post claims ___. It leaves out ___.

Model: The crop claims the activity is off today. It leaves out the old date.

Safe response

Words: pause, stop, tell, report, support

Start: The learner could stop ___ and ask ___.

Model: They could stop replying and ask trusted school staff for help.

Learning self check

Words: explain, reason, prompt, help

Start: I can explain ___ using the invented ___.

Model: I can explain the missing context using the invented notice.

Feedback and exit

Words: next step, response, private, adult

Start: A safer next step in the story is ___.

Model: A safer next step is asking staff before sharing the post.

Prompt ladder

Point to the place or instruction. Ask a short private question. Rephrase. Offer a scaffold or choice. Model the first step only, then return the task. Allow processing time and retain the usual aids. Record content prompts honestly.

Checks and planned access

Main hinge

A popular post uses a cropped notice with no date. What should the learner do? A: Share it now because many people liked it. B: Pause and check the full current notice with trusted staff. Correct B. Check privately through words, pointing, typing or usual aid. If B or safe equivalent with a reason, proceed. For A, unclear or no response, re-model missing context and use parallel check. Pass is not a wrong answer.

Parallel hinge

A post uses an edited picture of an empty room. Does that prove the next activity is off? A: No. Check the current full notice with trusted staff. B: Yes. A clear picture always proves the claim. Correct A.

Cognition and Learning

Short plain definitions, full fictional source beside each claim, visible model, seven scaffold banks and fewer written responses.

Communication and Interaction

Choice, processing time, familiar aid, typing, pointing, drawing or exact scribe/readback. Optional fictional pair talk; no public questioning.

SEMH

Predictable mild third-person examples, no personal online incident questions, private checklist, blank/pass and supervised step-out with supported return.

Sensory and Physical

Accessible print and seating, usual communication tools and quiet resets; all tasks possible offline without a phone.

EAL

Plan in any language. Explain crop, source, footprint and privacy with short fictional examples. Usual language support conveys the learner’s own meaning.

Optional private story checks

F: Which setting could limit who sees a post?

M: What is missing from the cropped post?

H: Why might two matching reposts still fail to confirm a claim?

Misconceptions

A private setting stops all copies and removes every trace. It can limit an audience. Copies, collection or other people’s posts may still exist; ask for help.

A polished picture or lots of likes proves a claim. A real picture may lack context or an edit may alter it. Check the source and evidence before sharing.

Privacy and safe support

Personal checklist

No names, usernames, passwords, account details, screenshots, private incidents or device checks. Keep the card with you. It is not collected, photographed, displayed or compared. Use only actions or symbols. No account names, passwords, locations, personal incidents or evidence copies. A fictional checklist, blank or pass is valid.

Discreet supervised step out

Before the lesson, quietly agree the familiar pause signal and supervised place/route with the learner. A pupil may show a pause card or use the usual aid without a public explanation. A staff member acknowledges and supports the agreed route; never send a learner off alone or remove supervision. Offer a neutral task and a supported return, or arrange a later private catch-up. Pass/step-out is not failure and does not require personal disclosure.

Help by type

Support may come from a trusted adult, school staff, a family doctor or a suitable helpline. Ask trusted school staff privately to help find an age-appropriate route and use reporting tools safely. If the first adult is unavailable or unhelpful, try another trusted adult through the agreed route. For immediate concern, get school staff straight away and use the school urgent procedure. No named service, number, website or live online task is needed.

Safeguarding

Any disclosure goes to the safeguarding lead through school procedure. Listen calmly, reassure, do not probe, investigate or promise secrecy. Follow urgent school procedures where needed. Keep actual concerns and identifying details out of class tasks and shared learning evidence; use the school separate safeguarding record. If a learner cannot identify a trusted adult, support them privately and do not press. The personal checklist stays with the pupil; scribe only by agreement and return it.

Learning evidence

Record learning from fictional tasks: privacy choice and limit; missing context/edit and evidence reason; safe next step and support type; chosen tier, usual aids, actual prompts, one NS and own response. Do not collect the personal checklist or real incident/account data. No claim of real-world account safety follows from classroom performance.

Feedback and marking

VF verbal feedback; WS worked with support; I independent; NS next step in green; // self-edit; ? read this back to me; E actual evidence banked; R responded. R only when Voice and Audience are present, one NS is set and the pupil responds in the same colour, on the same page or usual mode. Offer to the Communication portfolio; staff confirm any mapping.

Book first and cover fallback

Use books or usual modes for fictional explanations. If display equipment fails, read the printed invented examples from Support Cards. Keep the same forty-minute sequence and private response modes. Never substitute live feeds or pupil experiences. Staff do not request, copy or circulate private or harmful content as lesson evidence.
