Staff answers and cover notes

Suggested responses for the invented offline cases. Accept other safe, reasoned answers. Never assess a learner’s personal online life.

Privacy

Control over who can access personal details. Settings can limit an audience, but cannot stop every copy or later share.

Digital footprint

Information about a person that exists online, from their own actions and what others share or collect. Some information can last or be copied.

Media literacy

Skills for asking questions about what a message claims, where it came from and what supports it.

Manipulated

Changed or edited. An edit can alter meaning. Some edits are harmless, so context matters.

Misleading

Likely to give a wrong impression. A real image or true detail can mislead when context is missing.

Invented scene key

The crop leaves out the date and the edited room picture cannot prove a cancellation. The learner can wait and ask staff for the current full notice. Many shares would not make either post reliable.

Privacy choices

A smaller audience, location off and checking who can tag or contact the learner may reduce exposure. Settings differ between services and can change. They cannot guarantee that a recipient will not copy, capture or pass on content. A digital footprint can include a person’s posts and information other people share about them.

Supported

Use two clear choices, word bank, starter and visible fictional model. Point, draw, say or type; exact scribe and readback available. Identify a privacy limit, one missing clue and one safe help step.

Independent

Use the glossary, full invented source cards and normal aids. Explain a privacy choice and its limit, compare each post with its source and suggest a safe response with support.

Aspire

Keep usual aids. Explain how a crop or edit changes meaning, weigh evidence rather than appearance, and adapt the safe response if the first adult or reporting route is unavailable. Extra personal detail is never required.

Examples and check answers

A cropped notice

ACTIVITY CANCELLED TODAY The crop shows only the words Activity cancelled. No date or sender is shown. Full source: Full invented notice dated 14 January 2027: Activity cancelled on 14 January 2027. The next activity on 21 January 2027 will run as usual.

Suggested answer

Misleading context. The words are real within the invented notice, but the crop hides the old date and next-session line. Check the current full notice with staff.

An edited room picture

EMPTY ROOM PROVES THE ACTIVITY IS OFF A simple drawing has had the activity materials removed. The post gives no current notice. Full source: The original invented drawing shows materials in the room. A changed picture cannot establish the current plan.

Suggested answer

Manipulated image used as weak evidence. Editing can change a scene. Ask for the current full notice; do not rely on the image or likes.

A checkable update

The next activity is on. Check the current notice with staff. The message is dated 21 January 2027 and points to the full notice available from staff. Full source: Full invented notice dated 21 January 2027: The activity on 21 January 2027 is on as planned. Ask trusted school staff if you need the first step explained.

Suggested answer

Better supported within this invented exercise because a current full notice can be checked. A date or neat design alone is not proof; actual verification matters.

Main hinge

A popular post uses a cropped notice with no date. What should the learner do? Correct B: Pause and check the full current notice with trusted staff. Check privately through words, pointing, typing or usual aid. If B or safe equivalent with a reason, proceed. For A, unclear or no response, re-model missing context and use parallel check. Pass is not a wrong answer.

Parallel hinge

A post uses an edited picture of an empty room. Does that prove the next activity is off? Correct A: No. Check the current full notice with trusted staff.

What a check can establish

Compare the full original item, its source and date and an independent reliable source where possible, with trusted staff support. Reposts that copy the same claim are not independent checks. Appearance, likes or a missing clue alone do not prove truth or falsity. It is valid to pause and say there is not enough evidence.

Safe delivery and evidence

If something goes wrong

Support may come from a trusted adult, school staff, a family doctor or a suitable helpline. Ask trusted school staff privately to help find an age-appropriate route and use reporting tools safely. If the first adult is unavailable or unhelpful, try another trusted adult through the agreed route. For immediate concern, get school staff straight away and use the school urgent procedure. No named service, number, website or live online task is needed.

Discreet supervised step out

Before the lesson, quietly agree the familiar pause signal and supervised place/route with the learner. A pupil may show a pause card or use the usual aid without a public explanation. A staff member acknowledges and supports the agreed route; never send a learner off alone or remove supervision. Offer a neutral task and a supported return, or arrange a later private catch-up. Pass/step-out is not failure and does not require personal disclosure.

Privacy and safeguarding

Any disclosure goes to the safeguarding lead through school procedure. Listen calmly, reassure, do not probe, investigate or promise secrecy. Follow urgent school procedures where needed. Keep actual concerns and identifying details out of class tasks and shared learning evidence; use the school separate safeguarding record. If a learner cannot identify a trusted adult, support them privately and do not press. The personal checklist stays with the pupil; scribe only by agreement and return it.

Evidence and marking

Record learning from fictional tasks: privacy choice and limit; missing context/edit and evidence reason; safe next step and support type; chosen tier, usual aids, actual prompts, one NS and own response. Do not collect the personal checklist or real incident/account data. No claim of real-world account safety follows from classroom performance. VF verbal feedback; WS worked with support; I independent; NS next step in green; // self-edit; ? read this back to me; E actual evidence banked; R responded. R only when Voice and Audience are present, one NS is set and the pupil responds in the same colour, on the same page or usual mode. Offer to the Communication portfolio; staff confirm any mapping.

Self assessment

Ready to explain, With a prompt and Need another example describe learning only. All choices start blank. The personal checklist is a private planning aid and cannot certify that a learner is safe online. Do not collect it or infer current online risk from a blank or a choice.

Source and scope

Current statutory RSE and health guidance in force from September 2026 informs the narrow online and media content. Supplementary official education, privacy, cyber-security and information-evaluation guidance was checked. Owner brief supplies date, period and verbatim outcome from LAUNCH Weekly Spring row150. Source workbook not reopened. Accepted LAUNCH format supplies structure/style only. Official education, privacy, cyber-security and media-literacy guidance checked for this narrow lesson; no claim of complete statutory curriculum coverage. Original fictional examples and offline tasks.
