Your eyewitness evaluation

Tuesday 19 January 2027 | P2 | 40 minutes | Year A

Humanities | LAUNCH | Spring 1 Week 3 | HUM-LAUNCH-S1-W03

White paper version. Read quietly, point, write, type, speak privately or direct a scribe. You may pass. No public answer or reading aloud is required.

Learning outcome: Evaluate survivor testimony (curated online archive).

Route Supported

N1–N5 are wholly invented teaching materials about a fictional book display. They describe no real person or event. They are not survivor testimony, a composite or a model of anyone's Holocaust experience.

1 Use N1 with N2. Take the six checks one at a time; use the word mat and exact adult reading if helpful.

2 Compare the boxes and opening time with N3/N4. Point to the link from N1 to N5. Use a frame for a reason and a limit.

3 Write, type or dictate your own short judgement. Add why survivor testimony matters and one check with one respectful listening action.

Keep your own work in your book

In your book, evaluate N1 using the six checks. Use N2 for context and compare N3, N4 and N5. Write a short judgement with two card codes, one supported claim and one limit. Add two general points: why survivor testimony matters and how historians can check it while listening with respect.

A frame you may use

N1 is useful for ____ because ____. N2 tells us ____. N4 supports or challenges ____ because ____. N__ cannot prove ____. My careful conclusion is ____. For survivor testimony in general, I would check ____ and listen with respect by ____.

Plan in any language. Use typing or exact scribing as directed. Keep a record of the help used.

White paper version. Read quietly, point, write, type, speak privately or direct a scribe. You may pass. No public answer or reading aloud is required.

Learning outcome: Evaluate survivor testimony (curated online archive).

Route Independent

N1–N5 are wholly invented teaching materials about a fictional book display. They describe no real person or event. They are not survivor testimony, a composite or a model of anyone's Holocaust experience.

1 Use all five neutral cards and the six checks. Separate what was seen, planned, recorded later and copied.

2 Write a short judgement using card codes. Explain one agreement, one difference and why N5 is not an independent check.

3 Apply the questions to survivor testimony in general terms. Explain purpose, corroboration and respectful listening without inventing an example.

Keep your own work in your book

In your book, evaluate N1 using the six checks. Use N2 for context and compare N3, N4 and N5. Write a short judgement with two card codes, one supported claim and one limit. Add two general points: why survivor testimony matters and how historians can check it while listening with respect.

Route Aspire

N1–N5 are wholly invented teaching materials about a fictional book display. They describe no real person or event. They are not survivor testimony, a composite or a model of anyone’s Holocaust experience.

1 Keep the same six checks and common finish. Compare the value and limits of N1 and N4 for a specific claim.

2 Explain why closer timing or an official-looking record is not a guarantee. State what extra evidence would help and what remains unknown.

3 Explain why an uncertain detail need not invalidate a whole account. Discuss shared source origins and the limits of missing documents in general terms.

Keep your own work in your book

In your book, evaluate N1 using the six checks. Use N2 for context and compare N3, N4 and N5. Write a short judgement with two card codes, one supported claim and one limit. Add two general points: why survivor testimony matters and how historians can check it while listening with respect.
