Knowledge organiser for a memorial plan

Tuesday 2 February 2027 | P2 | 40 minutes | Year A

Humanities | LAUNCH | Spring 1 Week 5 | HUM-LAUNCH-S1-W05

White paper version. Read quietly, point, write, type, speak privately or direct a scribe. You may pass. No public answer or reading aloud is required.

Learning outcome: Create a respectful digital memorial.

A memorial can help people remember and learn. Today you plan a digital memorial as a private storyboard on paper or in a plain offline document. You will not build a website. The plan keeps people's dignity, accurate history and safe responsibility in view. Nothing is published, shared or uploaded.

Required parts

Title; dedication in your own words; three facts with codes; your own symbol idea and meaning; responsibility today. Arrange them as a private plan, not a published product.

Choose facts with care

Use three distinct facts from F1–F4/F6. F1: varied lives. F2: state jobs in Germany, 7 April 1933, with early exceptions. F3: citizenship rights, Germany, 15 September 1935 and later rules. F4: Holocaust definition and differing experiences. F6: the UK memorial day, 27 January. Read the cards for accurate wording; F5 helps you check.

Respect check	What to ask
Tone	Use calm, clear words. Avoid jokes, blame, slogans or demands to feel one way.
Accuracy	Check three different facts against F1–F4/F6. Keep dates, places and meaning. Add the codes; use F5 as a check.
Dignity	Remember full lives and communities. Use no individual victim names, photos, accounts, invented voices or imagined feelings.

Responsibility today

Accurate learning, checking claims and safe trusted adult help can follow remembrance. One design cannot tell the whole history or stop hatred on its own. A personal pledge is not required.

Historians and museum educators check facts and design clear, respectful ways to learn.
