Evidence for the written evaluation

Tuesday 9 February 2027 | P2 | 40 minutes | Year A

Humanities | LAUNCH | Spring 1 Week 6 | HUM-LAUNCH-S1-W06

Pink paper version. Read quietly, point, write, type, speak privately or direct a scribe. You may pass. No public answer or reading aloud is required.

Learning outcome: Structured evaluation of causes & consequences.

Assessing week | HUM-LAUNCH-S1-W06-E1

Keep the first attempt and follow-up in the learner's book or plain offline document. The adult records actual work, mode and support. This is not a write-on pupil task.

Adult record of actual evidence

Part	What to check in the learner's own work
Conflict causes	Two factors weighed; trigger distinct; evidence and reasons.
Rights steps	Germany; 7 April 1933, 15 September 1935/later rules, November 1938; effects explained.
Consequences	Careful explanation of harm and loss; full lives, differing experiences and limits.
Remembrance	Why it matters, safe responsibility, one limit and own judgement.
Assessment boundary	First attempt retained before review model; actual access and reasoning help recorded.

Actual date / work reference _____

Mode _____ Exact reading _____ Reasoning help _____

Own judgement and evidence codes _____

Adult reply / NS _____ Own supported edit / reason _____

Deferred work _____ Actual offline review _____

E remains unmarked. No upload, publication or sharing.

Six outcome evidence review

Tuesday 9 February 2027 | P2 | 40 minutes | Year A

Humanities | LAUNCH | Spring 1 Week 6 | HUM-LAUNCH-S1-W06

Pink paper version. Read quietly, point, write, type, speak privately or direct a scribe. You may pass. No public answer or reading aloud is required.

Adult tick-and-comment grid. The six scheme outcomes remain verbatim. Review real work in place; all ticks and comments start blank. A tick means relevant evidence was seen, not automatic completion of the full outcome.

Week and outcome	Seen	Comment and work reference
1 Explain the causes of a 20th-century conflict.	[ ]	Reference / actual scope ____ Mode / help / limits ____
2 Study the Holocaust sensitively (Holocaust Memorial Day).	[ ]	Reference / actual scope ____ Mode / help / limits ____
3 Evaluate survivor testimony (curated online archive).	[ ]	Reference / actual scope ____ Mode / help / limits ____
4 Why we remember: significance of remembrance.	[ ]	Reference / actual scope ____ Mode / help / limits ____
5 Create a respectful digital memorial.	[ ]	Reference / actual scope ____ Mode / help / limits ____
6 Structured evaluation of causes & consequences.	[ ]	Reference / actual scope ____ Mode / help / limits ____

If not yet evidenced or deferred, leave the tick blank and write that status with a next step. Attendance, quiet work, a partner answer or emotional display cannot tick an outcome.

Week 3: accepted work used neutral invented evidence and general discussion of testimony. Do not tick actual archive use or an actual survivor account; record the scope and any gap. Week 5: evidence is a private planned layout, not software operation or publication. Review it in place without copying or upload.

Week 6: record the retained first attempt separately from model-informed follow-up. No qualification completion is inferred. E remains unmarked.

Offer to the Communication portfolio as paper or offline work only. Retain the first attempt, response mode and actual help before showing the model. An adult replies with one NS (next step). The learner responds in the same colour, on the same page or usual mode before R. Label any model-informed revision as supported follow-up. Record the work location offline. Leave E unmarked; no evidence-app use, publication, sharing, export or upload. A partner’s work is not both learners’ evidence.
