Settlement and urbanisation

Humanities · LAUNCH · Autumn 2 · Week 3 · HUM-LAUNCH-A2-W03

Staff card

Staff print card

3 November 2026

Invite a response. Give thinking time. The learner may pass.

Arrival regulation check: Green · Ready, Amber · Help, Red · Pause. Say the words as well as showing the colours. Invite a response and allow a pass.

Code	Meaning
VF	Verbal feedback
WS	Worked with support
I	Independent
NS + …	Next step
E	Evidence captured
R	Pupil responded to feedback
//	Self-edit point
?	Read this back to me

At check-out, record E for … against the pupil's target.

Mark R only after the pupil has responded to feedback with an adult.

Return-to-learning route for this lesson: after a pause, rejoin Supported with card B and make one link from a cause to a possible change.

Soft instrumental music for transitions if the class plan says so

Sound is off by default.

Pupils edit in the same colour, on the same page.

Made by Matt

Humanities · LAUNCH · Autumn 2 · Week 3 · HUM-LAUNCH-A2-W03

P17 · SLT planning and evaluation

Explain settlement and urbanisation.

Stage	Minutes
Arrival including opening	4
Starter	3
I do	6
We do shared investigation	7
We do decision checkpoint	2
You do	12
Review and improve	3
Exit ticket	3

Planned adaptations

Need	Plan
Read or sequence	Pre-teach the distinction between growth and share. Reveal one card at a time.
Communicate	Offer pointing, speech, sign, writing or exact scribing.
Pause and return	Offer a quiet pause and one causal link on re-entry.
Access the diagram	Enlarge the view and identify the diagram or tally separately.

Catch-up embedded this lesson: the Starter revisits GIS layers and map clues, and I do revisits the difference between a description and evidence of change.

If behind

Keep the model distinction, one shared sort, the checkpoint, an independent explanation and the exit. Shorten repeated examples.

Staff evaluation

Evidence, adaptation and next teaching move

Made by Matt

P18 · Individual target opportunities

Use the learner’s actual agreed target.

Opportunity	Evidence	Actual support
Find a clue	Select a card detail.	_____
Explain	Link evidence to the answer.	_____
Check	Keep or revise one detail.	_____
Regulate	Use a pause or a private response.	_____

The teacher models one step. A second adult, if available, reads a card or records the exact response. With one adult, set out the card and return for the pupil’s reason.

Give time, point to a clue, ask a short question, then offer a frame or choice. Invite a response. The learner may pass.

Made by Matt

Humanities · LAUNCH · Autumn 2 · Week 3 · HUM-LAUNCH-A2-W03

First lesson back · once-only read

Check what pupils can show from the previous lesson and revisit it within the planned stage.

Use the diagram and fictional sample. For the later fieldwork enquiry, follow the agreed arrangements. Use neutral locations and no identifiable photos. Label indoor observation accurately.

Made by Matt

Arrival · Supported

Point to the picture that matches the top one.

The lower left sketch has the same three buildings.

Arrival · Supported

Is a settlement a place where people live or a change in urban share?

It is a place where people live.

Arrival · Supported

Do more buildings prove national urbanisation?

No. We need evidence that the share living in urban places rose.

Arrival · Supported

What could show population change?

Comparable population counts from two observations.

Arrival · Independent

Point to the picture that matches the top one.

The lower left sketch has the same three buildings.

Arrival · Independent

What is a settlement?

A place where people live.

Made by Matt

Arrival · Independent

Why do more buildings alone fail to prove national urbanisation?

Buildings do not measure the share of people who live in urban places.

Arrival · Independent

What evidence would you compare?

Urban and total population counts for the same area and definition across two observations.

Arrival · Aspire

Point to the picture that matches the top one.

The lower left sketch has the same three buildings.

Arrival · Aspire

Give an accurate example of a settlement.

A village, town or city is a place where people live.

Arrival · Aspire

What could local building growth tell us, and what can it not establish?

It may show more buildings in the area. It cannot establish a rise in the national urban share.

Arrival · Aspire

What makes two observations comparable?

Use the same area, urban definition and population measure.

Made by Matt

Starter

Which clues suggest a larger centre?

The larger view shows more buildings and more streets at the same scale.

Starter

Which clues suggest a smaller centre?

There are fewer buildings, one main road and more open land.

Starter

What does a GIS layer do?

It shows a chosen type of information over a map. A transport layer can show the station and bridge.

Starter

What can we infer from the diagram?

We can compare visible patterns. We need other evidence to count people or explain growth.

I do · 1

What is the claim?

More buildings prove national urbanisation.

I do · 1

What do more buildings measure?

They show building growth in the mapped area.

Made by Matt

I do · 2

How could work lead to growth?

Jobs may attract people and increase demand for homes.

I do · 2

How could transport or services help?

Better links or services may attract residents and businesses.

I do · 3

What does urbanisation measure?

A rising share of people living in urban places.

I do · 3

Can a settlement grow without that national share rising?

Yes. Population can grow in rural and urban places at the same time.

I do · 4

What figures would let us compare urban shares?

Urban and total population counts for two comparable observations.

I do · 4

What must be consistent?

Use the same boundary and definition of urban. Compare the share, as well as the raw counts.

Made by Matt

We do

Sort: a street has eight shops.

Land-use observation. It describes the sampled street.

We do

Sort: more jobs attract residents.

Possible growth explanation. Check it against local evidence.

We do

Sort: the share living in urban areas rises.

Urbanisation. This is a change in population share.

We do

What does the figure 12 in card C mean?

Twelve of the sampled uses are homes. The figure does not count residents.

We do

What is the total number of recorded uses?

8 + 12 + 4 + 6 = 30 recorded uses. It is fictional practice data.

We do decision checkpoint

Which claim fits the tally?

It shows eight shops in the sample. It does not measure population or identify the cause of growth.

Made by Matt

We do decision checkpoint

What would test the urbanisation claim?

Compare the share living in urban places across two observations with the same area and definition.

Made by Matt

Teacher answers · You do

You do · Supported

Check one cause and change.

For example, more jobs can attract residents, which can increase demand for homes.

You do · Supported

Check what the tally measures.

The sample counts land uses. Urbanisation measures a rising urban population share.

You do · Independent

Check your explanation.

Work, transport and services may attract residents and businesses. Use a diagram clue and label one figure as a practice tally.

You do · Independent

Check the distinction.

A settlement can gain people or buildings while the national urban share stays the same or falls.

You do · Aspire

Check whether your evidence supports the cause.

A map shows a pattern and the tally describes uses. Test a proposed cause with further local evidence.

You do · Aspire

Check your evidence for urbanisation.

Compare urban and total populations for two consistent observations. One street tally cannot establish the national trend.

Made by Matt

You do · Choice

Check your causal link.

Show one reason, such as work, linked to a possible change, such as demand for housing.

You do · Choice

Check your measure.

Name the land-use count and explain that urbanisation needs a comparison of urban population shares.

Made by Matt

Review and improve

Have I used a figure accurately?

Name the figure and what it counts. Label card C as fictional practice data.

Review and improve

Does my cause follow from the evidence?

Use may or could for a cause that the evidence has not yet tested.

Review and improve

What could make the evidence stronger?

Use comparable population data for change and separate local evidence for causes.

Exit · Supported

Can more buildings alone prove national urbanisation?

No. Urbanisation is a rise in the share of people living in urban places.

Exit · Supported

What further evidence would help?

Comparable urban and total population counts from two observations.

Exit · Independent

Why is adding buildings alone insufficient?

Building counts do not show how the urban share of the national population changed.

Made by Matt

Exit · Independent

Which population evidence would you compare?

Use the same boundaries and urban definition. Compare urban and total counts across two observations.

Exit · Aspire

Explain why settlement growth and urbanisation can diverge.

The urban population can rise while its share stays level if the total population grows at the same rate.

Exit · Aspire

What further evidence would make a trend comparison valid?

Comparable urban and total counts with consistent definitions and boundaries. Discuss changes in classification if relevant.

Exit · Choice

Show one way that local growth and urbanisation differ.

Accept an accurate contrast between local growth and a rising urban share.

Exit · Choice

Show what you would compare to test urbanisation.

Accept urban and total population counts for two comparable observations.

Made by Matt

Humanities · LAUNCH · Autumn 2 · Week 3 · HUM-LAUNCH-A2-W03

TA Brief

Explain settlement and urbanisation.

Arrival regulation check: Green · Ready, Amber · Help, Red · Pause. Say the words as well as showing the colours. Invite a response and allow a pass.

Use the diagram and fictional sample. For the later fieldwork enquiry, follow the agreed arrangements. Use neutral locations and no identifiable photos. Label indoor observation accurately.

Return-to-learning route for this lesson: after a pause, rejoin Supported with card B and make one link from a cause to a possible change.

Optional: show an adult one link between a cause and a possible change. Listen to one piece of feedback. Reply by revising the link, justifying it or asking for help.

Use one route. Record only the pupil’s own response and the support given. Next lesson: Local fieldwork and data collection.

Made by Matt

Humanities · LAUNCH · Autumn 2 · Week 3 · HUM-LAUNCH-A2-W03

Teaching script · Arrival including opening

Read the goal and use one Arrival route. Let the learner match the pictures before reading the other prompts. Arrival regulation check: Green · Ready, Amber · Help, Red · Pause. Say the words as well as showing the colours. Invite a response and allow a pass.

Made by Matt

Humanities · LAUNCH · Autumn 2 · Week 3 · HUM-LAUNCH-A2-W03

Teaching script · Starter

Invite a rural or urban classification and one visual clue. Revisit what a map layer shows. Compare the diagrams at the same scale.

Catch-up embedded this lesson: the Starter revisits GIS layers and map clues, and I do revisits the difference between a description and evidence of change.

Made by Matt

Teaching script · I do

Ask whether adding buildings proves urbanisation. Model a possible growth cause with card B. Separate the count of buildings from a share of people. Ask for comparable evidence.

Made by Matt

Humanities · LAUNCH · Autumn 2 · Week 3 · HUM-LAUNCH-A2-W03

Teaching script · We do shared investigation

Sort the three claims. Use the practice tally of 30 uses. Invite a reason, then check which measure fits each claim.

Made by Matt

Teaching script · We do decision checkpoint

Invite a private choice. Reveal that the tally supports only the sample count. Ask which other data would test a national trend. Optional: show an adult one link between a cause and a possible change. Listen to one piece of feedback. Reply by revising the link, justifying it or asking for help. Mark R only after the pupil has responded to feedback with an adult.

Made by Matt

Humanities · LAUNCH · Autumn 2 · Week 3 · HUM-LAUNCH-A2-W03

Teaching script · You do

Set out one route, the diagram and card C. Retain one explanation with a correctly labelled number and a clear distinction. Record actual prompting separately from access. Return-to-learning route for this lesson: after a pause, rejoin Supported with card B and make one link from a cause to a possible change.

Made by Matt

Humanities · LAUNCH · Autumn 2 · Week 3 · HUM-LAUNCH-A2-W03

Teaching script · Review and improve

Invite a check of a claim against its evidence. Ask for one improved link or limitation.

Made by Matt

Humanities · LAUNCH · Autumn 2 · Week 3 · HUM-LAUNCH-A2-W03

Teaching script · Exit ticket

Use the two exit prompts for the chosen route. Accept accurate equivalents and use the answer to plan the next prompt. At check-out, record E for … against the pupil's target.

What helped you most today, or what would you change next time?

Made by Matt

Humanities · LAUNCH · Autumn 2 · Week 3 · HUM-LAUNCH-A2-W03

Mark scheme

Credit	What to look for
Cause and change	Link work, transport or services to a plausible local change. Accept a chain from attraction to demand for homes or infrastructure.
Evidence	Use a correct figure from the fictional tally and a relevant diagram clue. Keep the count separate from population.
Concept	Distinguish settlement growth from a rise in the national share living in urban places.
Limitation	Explain that one sample cannot show the national trend. Specify comparable urban and total population counts.

Made by Matt
