Assessment protocol and key

My skills and next step: assessing lesson

Year A · Identity & Belonging · 14–18 December 2026 · 40 minutes

Before the initial record

Use familiar tasks from Weeks 2–4 and review actual evidence from Weeks 1–6. Do not model answers, rehearse matches or teach a new skill first. Read the exact instruction; accept speech, pointing, drawing, writing or an aid. Record mode and help. Exact reading or scribing is access support; a suggested answer, supplied question, step cue or reduced options is content support. Keep all first responses.

Check	Expected evidence and recording rule
Job knowledge	A–3: a shop helper helps a shopper find a tin. B–1: a garden helper waters pots. Task 2 is spare. Both matches and one relevant reason are required. A reason can be selected or spoken; record choice support.
Two-step task	First one circle in the tray; then one square next to it. Observe order and final set. A final set alone does not prove the order. The spare square is not used. Note any cue and whether a change was self-initiated.
Clarification	Present: Put the circle card in a tray. Wait for a question about which tray. Accept an equivalent question, gesture or aid selection. Fixed adult reply: Use tray 2. Observe one circle in tray 2. If no question occurs, record this before any prompt or feedback. A guessed correct tray does not prove clarification.
Earlier work	Use the actual work code and date. Record skill, clue from the work, job task and reason. Check whose work it is and what help was used. A shared team product needs an individual contribution record.
Feedback response	After the first record, give one specific point. Keep the learner’s reply or changed action separately, with support and date. Record a practical next step, help and intended review date. No copied model is independent evidence.

Observation: use private parallel sets only where an adult can see each turn. Within the ten-minute task block, queue short individual turns. If staffing or time prevents observation, mark not observed and arrange a dated check. Never infer success from another learner or a finished group tray.

Half-term evidence audit

Learner code _____ Review date _____ Staff role _____

For each week, record the actual work reference, date, individual contribution and help. Mark present, partial, missing or not observed. Do not backdate new work or infer success from attendance.

Week and focus	Work code, actual date, help and status
1 · Strength linked to a work task	_____ _____
2 · Two job/task matches and a reason	_____ _____
3 · Two-step sequence and check	_____ _____
4 · Question, understood reply and action	_____ _____
5 · Own team role and handover	_____ _____
6 · Skill, actual work, job link and next step	_____ _____

If an earlier item is absent, keep that gap. Week 7 evidence can show a skill now, with today's date. It does not establish that an earlier lesson was completed.

Review decision

Strongest supported claim and work reference

_____

Gap and planned dated check

_____

Individual assessment review

Learner code _____ Review date _____ Staff role _____

For each criterion use: shown without content prompt; shown with content support; not yet shown; or not observed. Record access support separately. A reduced task cannot establish the full criterion. No total score or qualification threshold is inferred.

Criterion	Initial judgement and evidence reference
Both job/task matches plus a relevant reason	_____
Both steps in order and correct final set	_____
Question about the gap and use of reply	_____
Earlier work shows skill; reasoned job link	_____

Later response: separate from initial judgement

Record	Actual response and reference
Specific feedback given	_____
Learner reply or changed action	_____
Support used after feedback	_____
Next step, help and review date	_____

Do not change an initial judgement to independent because feedback led to a correct reply. The revised action is useful evidence of response to feedback. Retain both records.

Feedback and storage

Use VF · WS · I · NS+ (Yellow Box) · // self-edit · ? read back · R responded · E evidence. R requires Voice, Audience, a specific NS+ prompt and the learner response in their own colour. E is recorded only when actual work is banked. Keep the initial record unchanged; record feedback and the later response separately.

Work storage code _____ Banked / part / not yet _____
Unfinished evidence _____ Next check date _____

This helps me show my skills and plan what to practise next.
