Rights and responsibilities at work

Exact scheme outcomes

Rights & responsibilities at work.

Source: LAUNCH Weekly Spring rows 94. Exact wording supplied in the owner brief; the source workbook is not redistributed. Timing and teaching examples are authored adaptations.

Purpose

Use an invented workplace that prepares paper packs. A worker has rights and responsibilities; the employer has responsibilities too. Sort examples, check the reason for each choice, then practise a calm request for help. All cases are invented. You do not need to describe your own or your family's employment. Rights are protections, not rewards for being a perfect worker.

Success checks

Distinguish a workplace right from a responsibility using at least two examples.

Explain how an employer and a worker both help to protect safety.

Choose a safe, respectful way to raise a workplace concern and explain why.

Prepare

Six invented scenario cards A to F, displayed or cut from the route pack.; Three heading cards: Right or protection; Worker responsibility; Employer responsibility.; Vocabulary mat, Support Cards and usual communication or access aids.; Books or usual response mode; Evidence Sheet; staff recording method for oral responses.

Forty minute sequence

Minutes	Phase	Teaching
0–5	Arrival and retrieval	Agree a response mode and recall one useful idea.
5–13	I do	Read the invented model; explain the key words; check understanding.
13–23	We do	Work as reader and checker, swap roles, then answer the hinge privately.
23–35	You do	Each learner gives their own response using a chosen route.
35–40	Review and exit	Review evidence, give one next step, keep the reply and save.

Processing time and brief pauses sit within these phases. Reduce repetition for access; do not add a timed speed test.

Teaching the ideas

Invented workplace

An invented, unnamed small workplace prepares paper packs. A supervisor gives instructions; a preparer and checker share the task. Use ready-cut paper only. All workplace stories, contract terms and payslips are invented teaching examples. They are not records of a learner’s employment.

I do model

Invented example: a new worker in the paper-pack business is asked to use equipment without having been shown how. The worker says, 'I have not had the training. Please show me the safe way before I start.' No equipment is used in this lesson.

The employer must manage work risks and provide the information, instruction, training and supervision needed for the job. The worker must take reasonable care, follow the safety training received and report concerns. Both have responsibilities; one person's duty does not cancel the other's.

The request names the problem and asks for a practical next step. A worker should not guess a risky method because someone is rushing. Pause the task that seems unsafe, move away from immediate danger and tell the supervisor. Seek further help if the concern is not resolved.

A workplace may expect a worker to follow the agreed start-time and absence procedure. That is a workplace responsibility. It does not mean that lateness removes a person's legal protections. Keep a concern about behaviour separate from a person's rights.

Some rights depend on legal employment status and other conditions. This lesson uses broad worker protections, rather than deciding anyone's legal entitlement. For a real concern, get help with the specific facts from a trusted adult and an appropriate independent employment adviser.

Check after I do

In the model, who has a safety responsibility: only the worker, only the employer, or both? Give one example.

Key: Both. The employer manages the risk and provides necessary training; the worker takes care, follows training and reports the concern. Accept one accurate duty for each.

We do in a pair

1. Put the headings Right or protection, Worker responsibility and Employer responsibility on the table. Read invented cards A to F. A card can link to more than one heading; explain the link instead of forcing one answer.

2. Learner one reads A, B and C, or asks an adult to read. Learner two places each card and says, 'I chose this because ...'. The reader asks, 'Who needs to do what?'. Do not act out a hazard or an argument.

3. Swap roles for D, E and F. Each learner may pass, point, write, speak, type or use an exact scribe with readback. An adult may take the partner role. Disagree about the card, not the person.

4. Choose C or E. Rehearse one calm request for help. The partner checks three things: the problem is clear, the request is safe, and the right person is asked. Swap so each learner produces their own request. Keep one reason for each learner's choice.

Decisions and individual work

Main hinge

A worker has not had the training needed for unfamiliar equipment. Which is the best response?

A. Guess the method so the order is finished quickly.

B. Pause the task, explain the training gap and ask the supervisor for a safe next step.

C. Say the employer has no responsibility because workers must take care.

Key: B. Check each learner privately. If either chooses A or C, revisit the model and ask who does what. Use the parallel hinge before independent work. An accurate choice needs a short safety reason; reading fluency is not assessed.

Parallel hinge

A worker was late yesterday. Today a supervisor refuses the training needed for the worker's task. Which statement is accurate?

A. The worker loses safety protections after being late.

B. The worker must use the equipment to prove effort.

C. Timekeeping can be discussed separately; the employer's safety duties still apply.

Key: C. Accept C with the reason that rights and safety duties are not rewards. If uncertain, give a two-choice oral version and model the first step only. Record support and revisit; do not force a public answer.

You do

1. In your book or usual response mode, choose two different cards. For each, identify the right or responsibility, say who should act, and explain your choice using a detail from the card.

2. Write or record your own response to card C or E. Use: 'The concern is ... . I would ... . I would ask ... because ...'. Keep the invented case separate from personal experience.

3. Explain one way the employer and worker both help with safety. Name one thing the worker should not do when unsure.

4. Check your work against the three success checks. Select one piece of your own evidence and one next step. Record the help used honestly.

Route choices and model fade

Supported

Work with cards A, B and C first. An adult can read one sentence at a time. Use the three headings and point to a choice. Use these starts: 'The worker has a right to ...'; 'The worker should ...'; 'The employer should ...'. Match a right with the person who has to act. For C, choose between guessing the method and pausing to ask for training. Explain by voice, pointing plus a short reason, usual aid or exact scribe. Then give your own help request. Keep one sort choice and one safe request as evidence. Use the same success checks; fewer repeated cases and normal access help are valid.

Independent

Sort all six cards and explain two choices. Identify where more than one responsibility applies. Give your own safe response to C or E. Name the person you would ask and a sensible next step if the concern continues. Explain why a mistake or lateness does not remove a worker's rights. Use the information in D or F.

Aspire

Compare C and F. Explain why pressure to finish quickly or a concern about timekeeping cannot settle a safety or rights question. Improve an unclear request: 'This is unfair.' Add the relevant facts, a safe request and the person who can help. Avoid claiming that every unfair feeling is unlawful discrimination. Identify one limit of the information available. Explain why real advice needs the actual circumstances and employment status. More writing is optional.

Model fade

Model the first decision, share the next with the pair, then remove answer cues for a fresh individual response. Keep normal reading, communication and calculation aids. Note any prompt that supplies the thinking.

Calendar: Spring 2 is 22 February to 25 March 2027. Four Friday P1 lessons: 26 February, 5, 12 and 19 March. Week 5 ends on Thursday; no Friday lesson. Week 4 is the taught closing lesson.

Access evidence and follow up

Area	Planned adaptation
Cognition and Learning	One step and one source at a time. Explicit model, small chunks, check-back, visible vocabulary and flexible pairs.
Communication and Interaction	Reader and checker roles; swap or let an adult take the other role. Rehearse a short frame; wait; accept exact scribe and readback.
SEMH	Predictable sequence, private check, choice of route and pass or pause with supported return. Keep scenarios fictional.
Sensory and Physical	Accessible seated work area, large print, usual aid, no fine-motor requirement or speed grade.
EAL	Plan in any language. Explain key words with the example; keep the concept demand while reducing reading load.

Prompt ladder

1 Point to the place or instruction. 2 Ask a short question. 3 Rephrase the instruction. 4 Provide a scaffold or choice. 5 Model the first step only, then return the task.

Speaking frames

Supported: I choose… because… Independent: The source says… so I would… Aspire: This evidence supports… but does not show…

Staff questions

Supported: Which line or clue helps? Independent: Why is that action useful? Aspire: What remains uncertain, and how could it be checked? Invite or pass; do not force a personal account.

TA focus

I do: point to the source and check key vocabulary. We do: protect equal turns and rehearse a question. Independent: record access and thinking prompts, then return ownership to the learner.

Evidence and feedback

Use the Evidence Sheet for actual work references and response mode. Keep the teacher grid separate from learner review. Missing evidence stays visible. VF verbal feedback · WS worked with support · I independent · NS next step · // self-edit · ? read this back to me · E saved evidence · R responded. Keep the first try, one NS and the learner reply. Record R only after Voice and Audience are clear and the learner responds to NS in the same colour, on the same page or usual mode. Offer to the Communication portfolio. Staff confirm any mapping to the unit award; no award completion is implied.

Private help

Use voice, writing, pointing, a usual aid, typing or an exact scribe. Read back and correct. Plan in any language. Ask a trusted adult privately; pass, pause and return with support. No personal work or family story is needed. If a concern is shared, listen calmly, do not probe or promise secrecy, and use the usual safeguarding route. Keep private concerns out of shared lesson work.

Where this leads

This helps me read workplace information, make a safe choice and explain a useful next step.
