Contracts and solving workplace problems

Exact scheme outcomes

Contracts & the law (basics).

Problem-solving in the workplace.

Source: LAUNCH Weekly Spring rows 96, 97. Exact wording supplied in the owner brief; the source workbook is not redistributed. Timing and teaching examples are authored adaptations.

Purpose

An invented employer prepares paper packs. Today the pair reads a fictional adult worker's contract extract and deals with a missing-materials problem. A contract sets terms for both sides. Real employment contracts can include written terms, spoken agreements and terms required by law. This classroom extract is incomplete and is not a document to sign. Use invented situations, not a personal employment story.

Success checks

Find the role, hours and pay in a fictional contract extract and identify one point to check.

Explain that a contract is an agreement with terms and cannot simply remove legal rights.

Use pause, check, ask and report to choose a safe response to a fictional workplace problem, giving a reason.

Prepare

Fictional contract extract and scenario cards A to D.; Two large ready-cut cards and one paper strip for the model; reset with a second strip only after clarification.; Supported, Independent or Aspire task pack; support cards; vocabulary mat.; Books or usual response aids; Evidence Sheet; optional exact scribe and readback.

Forty minute sequence

Minutes	Phase	Teaching
0–5	Arrival and retrieval	Agree a response mode and recall one useful idea.
5–13	I do	Read the invented model; explain the key words; check understanding.
13–23	We do	Work as reader and checker, swap roles, then answer the hinge privately.
23–35	You do	Each learner gives their own response using a chosen route.
35–40	Review and exit	Review evidence, give one next step, keep the reply and save.

Processing time and brief pauses sit within these phases. Reduce repetition for access; do not add a timed speed test.

Teaching the ideas

Invented workplace

An invented, unnamed small workplace prepares paper packs. A supervisor gives instructions; a preparer and checker share the task. Use ready-cut paper only. All workplace stories, contract terms and payslips are invented teaching examples. They are not records of a learner’s employment.

I do model

Invented example: a worker is told to prepare two paper packs. Each pack needs one large card and one paper strip. There are two large cards but only one strip. The order cannot yet be completed as written.

Pause: do not say both packs are complete. Check: read the order and count the materials once. Ask: 'The order needs two strips. I have one. Where should I get the other strip?' Report: tell the supervisor what has been checked and what remains missing.

The safe temporary solution is to keep the incomplete pack separate and ask for the missing material or a clarified instruction. This avoids passing an incomplete pack to the next person. Do not take stock without permission or hide the gap.

Contract link: the role asks the worker to check each pack, and the safety and instructions term says to pause and ask when materials are unclear. The contract extract does not answer every possible question; the worker can request the full terms or appropriate advice.

Check the model: 'I solved it by pretending the pack was complete' is not supported. 'I checked the order, reported one missing strip and kept the incomplete pack separate' accurately describes the action.

Check after I do

In the fictional extract, which clause tells us the worker's main task? Is the short extract the whole contract?

Key: The Role clause: arrange materials and check packs against the order. No; the extract says other terms are not shown, and a contract can include more than the written extract.

We do in a pair

1. Choose reader and checker roles. An adult can be the partner, or each learner can respond privately. Ready-cut paper only; no real tools, stock, customers or deliveries.

2. Reader locates the role, hours and pay in the contract extract. Checker points to the clause that supports each answer. Swap after the first two items so both locate a term.

3. Each learner chooses one missing detail to ask about, such as break arrangements or full holiday terms. Say the question; the partner checks that the extract does not already answer it.

4. Use scenario A. One learner reads the order and the other checks the count. Agree a safe next action using pause, check, ask and report. Swap roles and use scenario B.

5. Each learner records their own chosen action, reason and one evidence clue. Agreement between the pair does not replace either learner's own response. No speed score.

Decisions and individual work

Main hinge

The order and spoken instruction give different strip counts. What is the best next action?

A Guess and finish quickly.

B Pause, check both instructions and ask the supervisor which is current.

C Send the packs and say someone else checked.

Key: B. Each learner chooses privately and gives a reason. If either chooses A or C, or cannot explain the conflict, re-model checking the two instructions and asking one clear question. Use the parallel hinge before independent work. If both choose B with a sound reason, continue.

Parallel hinge

Only one of the two packs has been checked. Which report is supported by the facts?

A Both packs are checked.

B No one needs to know.

C One pack is checked; the second still needs a check before it is ready.

Key: C. Look for an accurate gap and safe next action. If unsure, show one checked pack beside one unchecked pack, read the order again and ask for a supported report. Record the support; do not infer independent understanding.

You do

1. In your book or usual response mode, record one term about the role, one about hours and one about pay. Point to the relevant clause for each.

2. Write or say one question about information missing from the extract. Explain why getting the answer would help the worker.

3. Choose scenario A or B. State the problem using only the facts. Give a safe action for pause, check, ask and report, and explain why your solution is useful.

4. Complete: 'A contract cannot simply remove legal rights because ...' Use the explanation or ask for a readback if needed.

5. Review your own evidence. Keep a missing step visible and add one next step after feedback. Do not copy the worked example as an action you actually took.

Supported

Use the highlighted contract labels Role, Hours and Pay. Point, say, mark or use an exact scribe with readback. Choose a question frame: 'Where can I find the full ... terms?' or 'Can you explain ...?' Use scenario A with the ready-cut materials. Arrange these action cards: pause; check the order; ask the supervisor; report the missing strip. Complete two frames: 'The problem is ...' and 'I would ... because ...'. Keep your own choice and reason; a partner may read the prompt.

Independent

Locate three terms and identify one missing detail without highlighted answers. Read scenario B. Explain which information is certain and which instruction needs clarification. Give your own pause, check, ask and report response and justify how it prevents an error. Explain why a short written extract is not the full contract and why a legal right cannot simply be signed away.

Aspire

Compare two possible responses to scenario C. Give a benefit and a risk of each before choosing the safer response. Explain why a contract can include terms beyond this extract, including some spoken or legal terms. Draft a short factual report with the order, what was checked, what remains uncertain and what help is requested. Keep blame and invented facts out. Add a follow-up check: how would the worker know the chosen solution has dealt with the problem? Additional length is optional.

Model fade

Model the first decision, share the next with the pair, then remove answer cues for a fresh individual response. Keep normal reading, communication and calculation aids. Note any prompt that supplies the thinking.

Access evidence and follow up

Area	Planned adaptation
Cognition and Learning	One step and one source at a time. Explicit model, small chunks, check-back, visible vocabulary and flexible pairs.
Communication and Interaction	Reader and checker roles; swap or let an adult take the other role. Rehearse a short frame; wait; accept exact scribe and readback.
SEMH	Predictable sequence, private check, choice of route and pass or pause with supported return. Keep scenarios fictional.
Sensory and Physical	Accessible seated work area, large print, usual aid, no fine-motor requirement or speed grade.
EAL	Plan in any language. Explain key words with the example; keep the concept demand while reducing reading load.

Prompt ladder

1 Point to the place or instruction. 2 Ask a short question. 3 Rephrase the instruction. 4 Provide a scaffold or choice. 5 Model the first step only, then return the task.

Speaking frames

Supported: I choose… because… Independent: The source says… so I would… Aspire: This evidence supports… but does not show…

Staff questions

Supported: Which line or clue helps? Independent: Why is that action useful? Aspire: What remains uncertain, and how could it be checked? Invite or pass; do not force a personal account.

TA focus

I do: point to the source and check key vocabulary. We do: protect equal turns and rehearse a question. Independent: record access and thinking prompts, then return ownership to the learner.

Evidence and feedback

Use the Evidence Sheet for actual work references and response mode. Keep the teacher grid separate from learner review. Missing evidence stays visible. VF verbal feedback · WS worked with support · I independent · NS next step · // self-edit · ? read this back to me · E saved evidence · R responded. Keep the first try, one NS and the learner reply. Record R only after Voice and Audience are clear and the learner responds to NS in the same colour, on the same page or usual mode. Offer to the Communication portfolio. Staff confirm any mapping to the unit award; no award completion is implied.

Private help

Use voice, writing, pointing, a usual aid, typing or an exact scribe. Read back and correct. Plan in any language. Ask a trusted adult privately; pass, pause and return with support. No personal work or family story is needed. If a concern is shared, listen calmly, do not probe or promise secrecy, and use the usual safeguarding route. Keep private concerns out of shared lesson work.

Where this leads

This helps me read workplace information, make a safe choice and explain a useful next step.

Calendar: Spring 2 is 22 February to 25 March 2027. Four Friday P1 lessons: 26 February, 5, 12 and 19 March. Week 5 ends on Thursday; no Friday lesson. Week 4 is the taught closing lesson.
