Aspire task pack

Exact scheme outcomes

Gather references & evidence.

Rights-at-work outcome.

In your book or usual aid. All examples are invented. Do not supply personal workplace, pay or contact details.

Worked example

INVENTED TEACHING EXAMPLE, NOT LEARNER EVIDENCE. An unnamed learner has one task sheet that shows a missing item was noticed before a paper pack was handed over. A claim that fits is: 'I checked this pack against the order.' A claim that goes beyond the sheet is: 'I always work perfectly.' The sheet shows one check, not every future action.

The model evidence record reads: 'Task sheet from a practice activity; one checked pack; adult prompted the first check; second pack not observed.' The honest next step is to try the same check again and record the support used. A model is never banked as a learner's completed work.

INVENTED MODEL REFERENCE. 'During one classroom practice activity, the learner checked one pack against an order after a prompt. I did not observe later work.' This is a model statement only. It is not a real reference, a staff judgement or proof of workplace attendance. A suitable referee must know the relevant work and agree before their details or statement are used.

Try a decision

A claim and its evidence

One dated classroom sheet records that a learner checked one paper pack after a prompt. The learner wants to write 'I always check every order without help.'

A possible referee

An adult observed a classroom task. No permission to use the adult's details or a statement has yet been sought.

An unavailable item

A learner cannot find the earlier payslip response. A partner offers a completed response to copy and label as the missing work.

Final rights at work scenario

An invented workroom task says 'check paper packs'. The worker is asked to use an unfamiliar machine without training. An invented payslip shows gross £1000, tax £100, NI £50 and printed net £900.

Aspire response

Your task

1. Compare two actual evidence items if available. Explain which better supports a particular claim and why. If only one is available, explain its limit without inventing a second.

2. Explain how a useful reference differs from a broad claim such as 'always perfect'. Consider what the referee actually observed and whether permission has been obtained.

3. For the final scenario, explain a second safe action if the first adult does not respond. Distinguish the calculation you can check from the legal or payroll questions that need an appropriate adult. Extra writing is optional.

Evidence to keep

Record an actual work reference and date, one precise claim, support used and a gap. Mark unavailable work honestly.

Record a possible referee role and permission plan. Do not contact anyone or write private details.

Use the invented scenario on the first page. Show your net-pay calculation, safe action, source clue, calm query and record to keep. The figures are practice amounts, not real deduction rates.

Review

Which actual item supports one claim you made today, or which item is still missing?

What permission step comes before using a referee's details or statement?

Name one safe first action from the final scenario and one next step for your own work.

Next step: add the exact work reference to one claim and explain how it supports your words.

The Evidence Sheet is available for typing or exact scribing. Keep your own words.

Use voice, writing, pointing, a usual aid or exact scribe. Check the readback. Plan in any language. Ask privately; pass, pause and return with support. No personal story is needed.
