Card stand planning knowledge organiser

Design and Technology LAUNCH Spring 2 Week 2 Thursday 4 March 2027 P1 Year A

Weekly outcome verbatim: CONSTRUCTION: select materials and plan the build.

I can choose a material and safe join, plan the parts and steps, and check a card mock-up.

Today I can

[ ] I can link a material property to the stand purpose.

[ ] I can record sizes, tools and a safety step in my plan.

[ ] I can make a card mock-up and use it to improve the plan.

The useful problem

Invented client Sam needs one landscape paper prompt card to stay upright on a clear desk. The card is 80 mm wide and 60 mm high. The default body base is 120 mm by 80 mm. The whole stand, including the channel, should fit a clear table area 160 mm wide by 120 mm deep. Design a small tabletop stand that supports it for 30 seconds without a hand, is easy to move, and has no loose sharp parts. Do not use a phone, cable or personal item for the test.

Default material and join

Adult model: thin card for the Week 2 mock-up and paper tape for the cold join. Thin card is easy to fold. The triangular shape may hold the card upright. Test the actual mock-up. A final material change needs a revised plan and adult check before Week 3.

Remember the parts

Body 120 by 260 mm, crosswise folds 80, 160 and 240 mm from the same short edge. U channel 100 by 30 mm, long folds 10 and 20 mm from the same long edge. Test card 80 by 60 mm.

Resilience and change

A mock-up can show a useful change before the main build. Record the real result and keep your revised plan. A model description or imagined test is not practical evidence.

Book first. Plan in any language. Point, speak, sign or confirm a scribe’s words.
