Teacher and cover plan

Design and Technology LAUNCH Spring 2 Week 2 Thursday 4 March 2027 P1 Year A

Choose materials and plan a card stand

Weekly outcome verbatim: CONSTRUCTION: select materials and plan the build.

LAUNCH Weekly Spring row 204. Year A. Resilience & Change. One 40-minute lesson for a small group aged 14 to 16.

Prepare

Retrieve the actual Week 1 specification and design. Prepare thin plain card, paper tape, pencil, ruler and suitable approved scissors. For the default full-size trial, provide the120 by 260 mm body blank,100 by 30 mm channel and80 by 60 mm landscape test card. Prepared parts are useful for the short independent stage; keep pupil and adult actions distinct.

A non-specialist cover adult can model ruler zero, two fold origins, the inside 20 mm tab and shallow U. Rehearse the assembly first. Approve actual tools, card and learner support. Do not improvise wood cutting, blade scoring or hot glue. If access is unsuitable, use prepared parts or the materials-free planning route with physical evidence pending.

Timing

Stage	Minutes
Arrival	5
Starter	3
I do	5
We do	7
We do 2	5
Independent	8
Review	4
Exit	3

Total 40 minutes. Demonstrations, mock-up and safety checks fit inside these stages. Calm pauses use tools down. Books first; pupil-directed scribing is confirmed.

Purpose and material properties

Design and Technology LAUNCH Spring 2 Week 2 Thursday 4 March 2027 P1 Year A

Arrival 5 minutes

Say and do: Retrieve the actual Week 1 choice and any adult-approved revision. Read the invented client brief. If the prior record is missing, use the labelled adult model and mark the missing pupil design; do not invent an earlier choice. Describe the 30-second test on a clear level desk. Allow a calm settling pause inside the time.

Check and response: Ask what the stand must hold and how it will be checked. Expect one landscape card, upright without a hand for 30 seconds. Reread the brief if needed.

Starter 3 minutes

Say and do: Show actual thin card and corrugated board if available. Bend gently with adult approval; do not tear or force. Read the model descriptions if samples are absent. Dowel and soft wood are alternatives for a different approved design; PVA and hot glue are joins, not sheet material. Hot glue is comparison only; no heated tool is used.

Check and response: Ask whether one model description proves the actual sample will work. No. Link a named property to a purpose, and keep actual sample results separate.

Measured parts and safe choices

Design and Technology LAUNCH Spring 2 Week 2 Thursday 4 March 2027 P1 Year A

I do 5 minutes

Say and do: Show the main blank and the cutting list. Measure 120 by 260 mm. Mark crosswise lines 80, 160 and 240 mm from the same short edge, not 80 then another 160. Name three 80 mm panels and the last 20 mm tab. Show the 100 by 30 mm channel and 80 by 60 mm test card. Model one plan row with tool and safety, then leave a row for the group. Diagrams are not full-size templates.

Check and response: Ask the length of the last tab. 260 minus 240 equals 20 mm. Repoint to the same measurement origin if 100 mm or another value is given.

We do 7 minutes

Say and do: Build a shared material, property, purpose reason. Default thin card folds easily; corrugated board may need adult-prepared folds or a revised plan. Paper tape joins the inside tab and channel. PVA may suit some materials but needs the actual adult label and full cure. Hot glue is not used in this block. Model why dowel or soft wood would need a new design, prepared lengths and adult-approved hand tools. Do not add sawing to this lesson.

Check and response: Accept another safe choice with a justified adult-approved plan. Check the pupil distinguishes sheet material from joining method and knows heated tools are not used.

Hinge and the card mock up

Design and Technology LAUNCH Spring 2 Week 2 Thursday 4 March 2027 P1 Year A

We do 2 5 minutes

Say and do: Hinge answer is fix the marks before cutting. Put scissors down and remeasure both lines from the same short edge. If anyone chooses cut or guess, model ruler zero and the origin again. Parallel check: PVA feels dry; can you test it before the actual full cure is complete? No. The adult checks the label and full cure. Recheck after reteaching.

Check and response: Move on when the pupil can use the same origin and describe the tool or cure control. Otherwise keep Supported and adult-prepared parts; practical evidence must name actual support.

Independent 8 minutes

Say and do: Use one route. Default mock-up uses thin card, paper tape and suitable scissors; pre-cut blanks may keep the task inside eight minutes. The pupil marks and folds with support, or directs adult handling. Close the triangle with the 20 mm tab inside. Fold the retaining strip along the two 10 mm and 20 mm lines into a shallow U. Tape the back flange to the bottom of the front sloping face; shelf OUT, front stop UP toward the card. Test only after an adult checks orientation and stability. If time runs out, keep the real stage and next step; never claim a finished mock-up.

Check and response: Check chosen material reason, three part sizes, plan tool/safety column, actual mock-up status and one real change or next check. Do not infer cutting if an adult supplied the parts.

Review and the next build

Design and Technology LAUNCH Spring 2 Week 2 Thursday 4 March 2027 P1 Year A

Review 4 minutes

Say and do: Check actual mock-up only if safe and ready. One landscape 80 by 60 mm card sits in the U channel without hand support for 30 seconds. No shaking, pushing or personal objects. A picture or imagined result is not this test. If it tips or slips, stop and use a real observation to plan an adjustment. Offer a private adult check; peer input is optional. Tidy inside the last minute.

Check and response: Pupil states what really happened and how the plan will change. A material-free route keeps mock-up and physical test pending, but can show a justified material choice and safe sequence.

Exit 3 minutes

Say and do: Retain the actual cutting list, sequence, material reason, mock-up status and next change for Week 3. Note which actions the pupil and adult did. Keep any cure or tool approval pending. Ask the pupil to confirm scribed words. Tools are returned and checked before leaving.

Check and response: Evidence is a pupil-owned material choice, measured list, safe plan and honest card mock-up record. The unit award is only named as the unit award; this lesson does not claim completion.

Keep for Week 3

Retain actual material choice, measured cutting list, sequence, mock-up state, real trial result and one change or next check. The Week 2 trial can be reused, finished or refined honestly. Do not claim it was a completed Week 3 build.

Access and adult support

Design and Technology LAUNCH Spring 2 Week 2 Thursday 4 March 2027 P1 Year A

Cognition and Learning

Read one material row at a time. Compare two options before more. Keep the cutting list beside the plan. Model one step with tool and safety, then fade to a prompt. Use a repeated stop and check routine.

Communication and Interaction

Accept pointing, speech, signing and pupil-directed scribing. Give thinking time and offer two choices before an open question. Read a scribed choice back for correction.

SEMH

Keep the brief about an invented client. Offer a private adult check and a calm pause. Put tools down before a pause and agree the safe return. An unfinished mock-up can show a useful next step.

Sensory and Physical

Offer adult handling, prepared parts, large marks and an accessible ruler view. Do not force texture contact or tool use. Record which actions the pupil did and which an adult did. Rehearsal is not cutting evidence.

EAL

Plan in any language. Pair the actual part with its size and material word. Use short chunks for material, property and reason. Preserve the pupil meaning in confirmed scribing.

Literacy and Numeracy

Read each size with its unit. Find ruler zero and the same measuring edge. Use a completed example row, then cover it. Read tools and safety columns aloud. A calculator or adult can support the 260 minus240 tab check.

Materials free fallback

With no card, tools, paper or printer, hear the model material descriptions and written sizes. Point, speak or sign a material choice and reason. Rehearse the steps with empty hands. An adult records exact confirmed words when a recording method is available. Mark transcription pending until it exists. A card mock-up and material tests stay pending; rehearsal is not practical evidence.

Where this leads

Construction designers and model makers choose materials, list parts and plan a safe sequence before a build. A small mock-up can reveal a change before more material is used.
