Sequence and evidence guide

Design and Technology LAUNCH Spring 2 Week 3 Thursday 11 March 2027 P1 Year A

Design and Technology LAUNCH Spring 2 Week 3. Use the dated teacher and cover plan and actual Week 1 design and Week 2 plan first. School and Public contain the same generic resources.

Design make evaluate

Week 1 defined the problem and chose a design. Week 2 selected materials planned the build and made a card mock up. Week 3 makes adjusts and improves the actual product. Only Week 3 is included here.

Purpose and default plan

Invented client Sam needs one paper prompt card, 80 mm wide by 60 mm high, upright and readable on a level table. Make a small card stand. It should hold that card for 30 seconds with hands away, fit within a 160 mm by 120 mm overall table area including the channel, let the card lift out by hand and have smooth safe edges. The default body base is 120 mm by 80 mm. These are design targets. Check the actual stand. No heavy object or extra load is used.

Default: one suitable thin card body 120 mm wide by 260 mm long. Mark folds across the width at 80, 160 and 240 mm from the same short end. This gives three 80 mm faces and a 20 mm joining tab. Fold a triangle and tape the tab inside the first face at the top seam. Add a 100 mm by 30 mm retaining strip with long folds at 10 and 20 mm from the same long edge. Fold a shallow U channel. Tape its back flange at the bottom of the front sloping face. The shelf projects out and the front stop faces upward toward the card. Leave the stand ends open. Use the actual approved revised plan if it differs.

Keep the evidence together

Retain actual work with date, pupil and adult roles, design and plan references, safety checks, each adjustment and reason, recheck results and unfinished stages. Use a new dated plan if an earlier record is missing.

Book first and tiers

Use the book and choose Supported Standard or Stretch. Type instead begins closed. Save my responses makes a local text file. Rehearse in any language and record actual support.

Where this leads

Construction makers follow plans, choose safe methods and use checks to improve a product. A clear change log helps another person understand why the build changed.

Safe routes and evidence boundaries

Design and Technology LAUNCH Spring 2 Week 3 Thursday 11 March 2027 P1 Year A

The default route

The default uses suitable thin card, approved scissors, finger folds and paper tape. No glue is needed. A different actual approved design needs its own checked sizes, method and support. Corrugated board may need prepared pieces. Dowel and soft wood are comparison choices from Week 2, not permission for wood cutting here. PVA is used only if the actual plan and adult label checks approve it, with full stated cure before testing. Never invent a cure time. Hot glue is comparison only and is not used. No power tools or heated tools are used.

Tools and support

Retrieve actual Week 1 designs and Week 2 material choices, cutting lists, step plans and card mock ups. Prepare suitable thin card, rulers, pencils, approved scissors, paper tape, a demonstration sample and one 80 mm by 60 mm paper test card. Try the actual scissors on a sample first. The card must cut and fold safely. Check the clear work area, stable seat, tool condition, support and access needs. Keep prepared pieces available. Reuse and refine an actual Week 2 mock up honestly where suitable. Never relabel it as a new independent build. Count issued tools and arrange safe storage for unfinished work.

Materials free alternative

With no card or safe equipment, use the supplied plan for a directed sketch or empty hand rehearsal. Say where you would cut, fold, join and stop to check. Log a proposed change as a proposal. Label the work planning or simulation. Actual cutting, joining, adjustment and testing evidence stay pending unless those actions take place.

Actual changes

Record each adjustment as it happens. Include the original plan, the actual check, the change, why it helps, adult approval and the recheck result or pending status. If no change is needed, record the real checks. Do not invent an error.

The unit award

Retain relevant evidence for the unit award. A weekly record does not confirm that the unit award is complete. Keep unperformed practical skills pending.
