OPENING RESILIENCE & CHANGE

Evaluate card stand strength and finish

I can check my actual stand, make a useful change and explain the result.

Weekly outcome

CONSTRUCTION: evaluate strength and finish.

Use your actual item and keep a true before and after record.

ARRIVAL 5 MINUTES

Find the real stand and record

Retrieve the actual design, item and change log.

Keep unfinished work and adult models honestly labelled.

Wait for adult clearance of edges, joins and level table.

STARTER 3 MINUTES

Strength or finish

Feature	What we check
Strength	Body and joins support the intended one-card load.
Finish	Safe edges, neat folds, flat tape and an open aligned channel.

Use real findings. A model picture is not a test.

I DO 5 MINUTES

A safe normal-use load test

Adult clears actual work and level table.

One 80 by 60 mm lightweight paper card, central in U channel.

Hands away 30 seconds. Stop at first concern.

Remove card and inspect. Record actual time and result.

WITHIN I DO SAFE TESTING

Know the stop signs

Slip, tilt, bowing or a loose join.

Damage, concern or the adult stop signal.

Stop. Follow the adult. Never add load after a stop.

No pushing, shaking, dropping, heavy objects or tests to failure.

WE DO 7 MINUTES

Our first test and finish check

Record actual count, time and observation.

Check safe edges, folds, tape and channel.

Keep strength and finish findings separate.

Say what you did and what the adult did.

WE DO 2 5 MINUTES

Should the next card be added

The stand tilts during the one-card test.

Should you add another card to test its strength?

A Yes B No C Only if you hold the stand

Explain the safe response.

INDEPENDENT 8 MINUTES

Improve one feature and recheck

Choose a real finding and agree a safe useful change.

Make the improvement with approved support.

Recheck with the same ONE card first.

Log before, change, why, after result and support.

WITHIN INDEPENDENT ONE ROUTE AT A TIME

Supported Standard or Stretch

Supported: one check at a time; confirm your own finding.

Standard: fair before and after one-card test and improvement log.

Stretch: explain limits; extra-card comparison only after baseline pass and adult clearance.

Maximum 3 identical paper cards total. Stop at first concern.

REVIEW 4 MINUTES

Explain strength finish and change

Put tools down and return them as agreed.

Compare the same one-card conditions.

What did the actual recheck show?

Keep a remaining gap or next step.

WITHIN REVIEW EVIDENCE AND ACCESS

A true evaluation record

A planned 30 seconds is not an actual timed result.

A model or simulation is not pupil testing or repair.

One-card success does not prove maximum strength.

No item: explain a model check and keep practical evidence pending.

EXIT 3 MINUTES

My test and improvement record

My strength check showed ___.

My finish finding was ___.

I changed ___ because ___.

The recheck showed ___ / is pending because ___.
