Staff cost answers and checks

Design and Technology LAUNCH Spring 2 Week 5 Thursday 25 March 2027 P1 Year A

Default material total

One whole 210 mm by 297 mm thin-card sheet at 30p plus three 10 cm tape lengths at 5p each gives 30p + 15p = 45p = £0.45. Tape allowance is 30 cm. A 60p model budget has 15p left.

Why one sheet is enough

Body 120 mm by 260 mm fits a 120 mm strip. The remaining 90 mm by 297 mm strip holds the channel rotated to 30 mm by 100 mm and an 80 mm by 60 mm test card below it. Charge that sheet once including offcuts; do not price each part or test card again.

Actual allocation and reuse

Do not force 45p onto every pupil product. Use actual recorded issued quantities and adult-agreed invented prices. Reused Week 2 work is not recharged each week. A separately allocated extra trial sheet or tape is recorded once with real waste. Unknown quantity or an absent product uses a labelled estimate, with actual product cost pending.

A cost change

One extra allocated 10 cm tape length adds 5p, making the model total 50p = £0.50. Optional finishing paper adds 5p only if allocated, or is a labelled hypothetical comparison. Do not silently add it to every total.

Enterprise distinction

90p invented asking price minus 45p materials cost leaves 45p above materials cost before unpriced labour, tools and overheads. This is not net profit. With 50p materials, the difference is 40p before other costs. No actual sale is required.

Staff presentation and review checks

Design and Technology LAUNCH Spring 2 Week 5 Thursday 25 March 2027 P1 Year A

Hinge and parallel response

Hinge: do not add the test card again after charging its whole sheet. Put duplicate model charges aside and reread the allocation. Parallel: 90p minus 45p is not final net profit because other costs are unpriced. Reteach and ask a fresh explanation before independent work.

Presentation duration

The slices total 20 + 30 + 30 + 20 + 20 = 120 seconds. This is a planning card, not proof a talk happened or lasted two minutes. Record actual mode, observed duration, support and own explanation. A private oral talk about a labelled estimate can be real presentation evidence without a physical product.

Grid status and unit award

Use five weeks and six rows: Week 5 includes two exact outcomes. Shown records real evidence with a location and comment. More to do records partial work or a step still needed. Not yet seen records no available evidence. Ticks do not certify completion of the unit award.

Cold call with a response choice

Foundation: How much is one sheet plus three model tape lengths? Expected 45p materials cost.

Middle: Why is the test card not added again? Expected the whole issued sheet already includes it.

Higher: Can you actually present without a made item? Expected yes, explain a labelled planned-product estimate and real progress; making, testing and actual product cost remain pending if not evidenced.

Own words and gaps

Read confirmed scribing back. Keep pupil judgement separate from adult observation. Do not invent earlier tests, changes or independence. A missing record leads to a next opportunity.
