Support for tectonic explanations

Tuesday 23 February 2027 | P2 | 40 minutes | Year A

Humanities | LAUNCH | Spring 2 Week 1 | HUM-LAUNCH-S2-W01

White paper version. Read quietly, point, write, type, speak privately or direct a scribe who reads your words back. You may pass. No public answer or reading aloud is required.

Step 1 find the movement

Point to D1, D2 or D3. Say apart, together or past. Use C1, C2 or C3. An adult can read one card quietly.

Step 2 explain the earthquake

Use this chain: plate moves slowly; fault locks; strain builds; fault slips; waves cause shaking. Frame: Because the fault was locked while ____, strain ____. When it ____, ____.

Step 3 explain the volcano

Use D2. The sinking plate brings water down. Water helps mantle rock melt. Magma can rise to the surface. Frame: A volcano can form here because ____, so ____.

Step 4 use the real event

Use C4. The event was in the Tohoku region of Japan on 11 March 2011. Finish: The Pacific plate ____. Part of the fault ____. Strain ____. When it ____, ____.

Partner roles

Analyst makes one cause chain. Checker finds the card and asks why. Swap. Each learner keeps their own final response.

Support and a private pause

Tuesday 23 February 2027 | P2 | 40 minutes | Year A

Humanities | LAUNCH | Spring 2 Week 1 | HUM-LAUNCH-S2-W01

White paper version. Read quietly, point, write, type, speak privately or direct a scribe who reads your words back. You may pass. No public answer or reading aloud is required.

A model to finish

Teacher-written model: At a transform boundary the plates slide past. A fault can lock, so strain builds. When the fault slips, ____ . Finish the link, then try the Japan chain with the model covered.

Check the link

A label names the boundary. An explanation says how the hazard forms. Include the steps between movement and shaking or magma. Do not say that every earthquake comes from an eruption.

PAUSE

Point to PAUSE or tell the adult privately. Use the agreed supervised place. You do not need to explain to the group. When ready, choose a private recap or the neutral paper-strip task. The adult can help you rejoin.

Neutral movement task

Use two plain strips of paper on a desk. Show them moving apart, together and past. No disaster example is needed. Stop when you wish. This is optional practice, not proof of the full lesson outcome.

My next step

Choose a movement word, one because link or a private recap. Plan in any language. Use your usual aid. Keep the help actually used visible.
