Support for explaining hazard effects

Tuesday 9 March 2027 | P2 | 40 minutes | Year A

Humanities | LAUNCH | Spring 2 Week 3 | HUM-LAUNCH-S2-W03

Pink paper version. Read quietly, point, write, type, speak privately or direct a scribe who reads your words back. You may pass. No public answer or reading aloud is required.

Step 1 keep one case

Say the country, region and date: Tohoku Japan, 11 March 2011. This is the same case as Week 1, not a new recent event.

Step 2 explain a direct effect

Use D1 and C1. Frame: Ground shaking damaged ____. This is primary because the damage came directly from ____.

Step 3 explain a secondary effect

Use C2. Frame: Sea floor movement displaced ____. This caused a ____, which flooded ____. Explain the steps before adding the label.

Step 4 link management

Use C3. Choose a physical protection measure and a preparation measure. Frame: ____ reduces risk because ____. Its limit is ____.

Partner roles

Analyst explains one link. Evidence Checker asks how the source supports it. Swap. Keep your own response.

Support and a private pause

Tuesday 9 March 2027 | P2 | 40 minutes | Year A

Humanities | LAUNCH | Spring 2 Week 3 | HUM-LAUNCH-S2-W03

Pink paper version. Read quietly, point, write, type, speak privately or direct a scribe who reads your words back. You may pass. No public answer or reading aloud is required.

A model to finish

Teacher-written model: A coastal barrier is protection because it is a physical structure. It can reduce some impacts, but ____. Practised routes are preparation because ____. Finish each link, then cover the model.

Warning check

An earthquake must have started before its waves can be detected. Early warning is not an exact prediction. A useful warning needs a prepared response. No measure removes all risk.

PAUSE

Point to PAUSE or tell the adult privately. Use the agreed supervised place. You do not need to explain to the group. When ready, choose a private recap or the neutral time sort.

Neutral time sort

Put wake up, lunch and evening meal in order. Use first, next and later. No hazard detail is needed. Stop when you wish. This is optional practice, not proof of the full outcome.

My next step

Choose one effect link, one management link or a private recap. Plan in any language. Use your usual aid. Keep actual help visible.
