Enterprise knowledge and examples

Pink supported edition

Enterprise: from garden to table.

Linked work

A chain shows how growing could lead to a useful offer.

Offers can help early

A starter-plant pot is a product near growing.
Supervised label-check help is a service near care.

All examples are invented.
No food is handled, eaten or sold today.
The pea trays remain for observation.

The first three links

Link	Meaning
Grow	Start a suitable crop with the resources and space it needs.
Care	Check plants and give only the care they need.
Adult checks	Check readiness, suitability and safety before harvest or food use.

Keep caring if a crop is not ready.
Adult checks come before food use.

Later possible links

Link	Meaning
Harvest if approved	Collect a crop only when ready and approved.
Prepare if approved	Food preparation needs suitable adult checks and safe conditions.
Offer or use at a table	A ready, suitable offer may be used or offered. No sale or eating happens today.

These links need readiness and adult approval.
They are not instructions to use food today.
