Costing and marketing jobs

White standard edition

Cost, price & marketing (links Maths).

Cost one offer

Use checked group figures or label the work invented model practice. Keep them separate.

1 Match each quantity to cost each.
2 Multiply for line costs and add the batch total.
3 Divide by usable finished units for cost per unit.
4 Propose a price and say why.

Our record

Use the blank Costing Record. Mark unknown figures to check. Include agreed costs beyond materials where relevant. Use one currency unit consistently. A calculator or adult scribe may help.

Covering the costs counted

In the invented example, ten ready units have already cost £7.00. There are no further costs. At £1.00 each, seven sales bring in £7.00 and cover that spent batch. At ten sales, income is £10.00 and surplus is £3.00 before any other costs.

My one line

Our cost per unit is ____; our proposed price is ____ because ____.

These are proposed figures until checked. No buying, selling or money handling today. Use your book or ask an adult to scribe. Return cards and tell an adult before a quiet pause.
