# Our making and quality checks

Produce & prepare the product.

Gardening and enterprise
Resilience & Change

# The ready to work check

Confirm the chosen offer, materials and role codes.

Ask the adult to approve today’s actual making task.

Use the plan, or record a changed task with a reason.

Unapproved stock stays out of production.

# Our quality check meanings

| Result | What happens next |
|---|---|
| **Pass** | The agreed check is met. Adult review still applies. |
| **Rework** | Correct the problem and check again. |
| **Hold** | Keep the item out of any offer. Ask the adult. |
| **Release** | Only the adult confirms readiness for a future offer. |

A tidy appearance alone does not prove readiness.

# The agreed making job

Follow the order and make one small part at a time.

Check the label, care advice and safe assembly.

Set aside anything damaged, unclear or unsuitable.

Keep finished components separate from items on hold.

# A quality decision

A pot has a tidy label but the plant identity is uncertain.

A  Mark the offer ready because the label is tidy.

B  Hold the offer for the adult to resolve the uncertainty.

A readable label cannot confirm what the plant is.

# Our actual quality record

| Field | Actual result to complete |
| --- | --- |
| **Item or part** | Code ____  Job completed ____ |
| **Checks** | Label ____  Advice ____  Safe assembly ____ |
| **Result and change** | Pass / rework / hold ____  Change ____ |
| **Review and storage** | Review ____  Storage or care ____ |

Use the quality card. Record ready and held quantities honestly.

# My making evidence

I made or checked ____;

the quality decision was ____ because ____.

A repair or hold can show a useful quality decision.

# Review and safe storage

Count what is ready, needs rework or remains on hold.

Confirm adult review, storage and any plant care.

Return tools, clear the space and wash hands.

A future stall depends on approval and suitable stock.
