Tool safety and hygiene card

White standard edition

Produce & prepare the product.

Adult checks before making

The adult approves the offer, actual materials, tools and work area. Keep walking routes clear. Choose a label, recorder or observer role if you prefer.

Clean hands and separate work

Wash hands before clean paper work and after plant, pot or soil contact, including when gloves were worn. Cover cuts and use suitable gloves for soil work. Keep food and drink away. Do not taste plants or put materials near your mouth.

Safe tools and materials

Use pencils and adult-prepared parts. Any hand tool must be checked and demonstrated. Carry a hand trowel low with its point down and park it safely. No sharp blades, chemicals, powered tools or food preparation are used.

Stop and check

Stop for a spill, damaged tool, uncertain plant or unclear instruction. Tell the adult. Avoid raising dust. Check quality before the adult releases any item for a future offer. Return tools, clear the surface and wash hands.
