Production and quality jobs

White standard edition

Produce & prepare the product.

Make and check

1 Confirm the approved task, materials and role.
2 Complete one agreed making or checking job.
3 Compare the actual work with its quality criterion.
4 Record pass, rework or hold and a reason.

Quality decisions

Pass: the checked feature meets its criterion.
Rework: correct a fixable problem and check again.
Hold: separate the item and ask the adult to resolve uncertainty. A pass tick alone does not release a whole offer.

Production and quality jobs continued

White standard edition

Record the actual work

Use Quality Check in your book or ask for scribing. Say whether you completed a part, whole offer or mockup. Check readable labels, accurate advice and safe assembly. An actual plant needs adult-confirmed suitability.

My one line

I made or checked ____; the quality decision was ____ because ____.

Finish safely

Keep held work separate. Only the adult releases checked stock and agrees storage and care. Return tools, clear the surface and wash hands. Park materials and tell the adult before a quiet pause. No real sale today.
