Our enterprise evaluation

Evaluate enterprise; evidence.

Gardening and enterprise
Resilience & Change

The records we actually have

Gather actual costs, sales, stock and quality records.

Keep rehearsals and invented examples clearly labelled.

Leave missing evidence unknown and explain the limit.

A missing cost prevents a final profit claim.

Six outcomes to review

Scheme row	Outcome to consider separately
118	Enterprise: from garden to table.
119	Plan a product/service to sell.
120	Cost, price & marketing (links Maths).
121	Produce & prepare the product.
122	Run a sale/market stall.
123	Evaluate enterprise; evidence.

Choose one outcome. Describe what you did and what helped.

An invented simple surplus

Eight £1.00 sales give £8.00 sales receipts.

All ten units cost £7.00. Two units remain unsold.

£8.00 less £7.00 = £1.00 simple surplus.

The £5.00 float is returned separately. Other costs would change this.

An evaluation decision

Receipts £8.00. Full batch cost £7.00. Two units are unsold.

A The simple surplus is £1.00.

B The simple surplus is £2.40.

Invented model only. Assume no other costs.

Our evaluation record

Part	Actual evidence or honest limit
Result	Receipts ____ All costs ____ Profit or loss ____
Stock	Unsold ____ Storage or care ____
What worked	Evidence ____ Why it helped ____
What to change	Change ____ Reason ____ Evidence still needed ____

A simulated result stays labelled simulated.

My enterprise reflection

Our evidence shows ____;

next time I would ____ because ____.

Use your actual experience and explain any missing evidence.

Review and unit close

Check the calculation and return the float separately.

Keep the plan, work, quality checks and honest records.

Agree a useful next step and return materials safely.

The staff evidence record supports review for the unit award.
