Independent route

Year A | Autumn 2 · Week 2 | 9 November 2026

I can update two score variables when the player touches a pickup or a hazard.

1. Open your maze file for card A or B and check the start reset.
2. Build the pickup contact rule to change the pickup score by 1.
3. Build the hazard contact rule to change hazard hits by 1.
4. Return the player to the start pad after a hazard hit.
5. Test pickup contact, hazard contact and start reset with a partner.
6. Save, close and reopen the file. Check both event rules.

Check my work

[ ] I added a rule that changes the pickup score by 1 on contact.

[ ] I added a rule that changes hazard hits by 1 on contact.

[ ] I used change blocks for events and kept set blocks for start.

[ ] I tested both events and the start reset with a partner.

[ ] I reopened my saved file and checked both event scripts.

One reason to use change instead of set

_____

You may point, speak, build or ask for exact scribing. Each person keeps their own project file and check.
