Pupil studio resources & worksheet — Surface texture skills lab

Pathway: BASE · Week 3 Part 2 · Big question: How can we use foil and dry brush marks to make card look like old metal?

Arrival check

Look at the two sample squares on the tray. Which one looks shiny like metal?

[ ] The pressed chrome foil square

[ ] The dark card brushed with chrome on the bumps

[ ] Both look like real metal panels

Starter visual cues

Trick 1: Lay soft foil on a foam mat. Press with a blunt stick.

Flip the foil over to see the raised bumps.

Trick 2: Wipe almost all chrome paint off a stiff brush.

Drag the flat brush tips lightly across dark ridged card.

Vote: Why do we wipe most of the paint off the brush on a paper towel. First dry brushing?

Studio practice planner

Pick your surface trick, mark set, and colour finish for the skills lab.

Shapes/Focus: Bolt dot bolt rows, Crossed steel beams, Arched iron plate, Grid mesh panel

Tools/Methods: Blunt stick on foil, Chrome dry brush, Rust orange dry brush, Ridged black card

Exit ticket

Why do we put a soft foam mat under craft foil when we press lines?

[ ] So the foil stretches into raised bumps without ripping

[ ] To make the table wet

[ ] To hide the foil
