Tier pack: Independent route — Surface texture skills lab

Pathway: BASE · Week 3 Part 2 · Big question: How can we use foil and dry brush marks to make card look like old metal?

Independent route studio steps

Step 1: Emboss a strong frame beam. Bolt dot mark set into a foil square on foam.

Step 2: Load. Wipe your own stiff brush. Then dry-brush chrome onto black ridged card.

Step 3: Test a second dry-brush square using warm rust orange over dark grey card.

Step 4: Label each square with the tool. How you controlled pressure.

Success check

Three texture squares done. Labelled on the lab sheet.

Key words helper

• press: To press a raised bump or line into soft foil.

• dry brush: A brush with very little paint dragged lightly over bumps.

• metal: A hard shiny art tool like iron, steel, or tin.

• surface: The top layer of your card or foil.

- ridge: A long raised bump on a surface.

Review checklist

[ ] Tilt your foil square in the light to check how the bumps shine.

[ ] Check that your dry-brushed card still has dark grooves between the chrome lines.

[ ] Tell a partner which of the two tricks you liked best.
