TA studio brief — Curate the studio showcase

Pathway: BASE · Week 7 Part 2 · Big question: How do we arrange and label our relief panels for a class art show?

TA practical setup & focus

Run a flat level string line across the display board at pupil eye level and provide a 10 cm card spacer block so pupils can space frames evenly.

Studio kit: Finished Week 6 framed relief panels, printed art wall label cards, black pens, display pins/blue-tack, yellow praise sticky notes

Key words to prompt

• set out: To choose and arrange artworks neatly so people can enjoy them.

• art show: A wall or table display where finished art is shared.

• label card: A small card next to an artwork naming the title and tools.

• eye level: At a comfortable height to look at without bending or stretching.

• space: Leaving an even gap between each picture on the wall.

Supported route steps

1. Pick a title. Tick the art tools you used on your art wall label card.

2. Use the card spacer block to place your panel in a straight row on the display table or wall.

3. Place your label card neatly under the bottom corner.

4. Put one star praise note next to a friend's panel. Tell them what you liked.

Check: Label done, panel spaced neatly,. One peer praise note given.

Review & exit support

Exit question: What does it mean to 'set out' an art art show?

Staff note: Staff preparation only: review a short guide on setting up a classroom art wall walk with physical spacer blocks and peer praise notes.
