Knowledge organiser (TRACK) — Plan and rehearse a studio skill demonstration

Pathway: TRACK · Week 6 Part 2 · Big question: How do we break a practical relief or surface technique into three teachable steps for peers?

Core studio focus

Family: Studio suite

Big question: How do we break a practical relief or surface technique into three teachable steps for peers?

• Choose one studio technique you mastered in this unit (card lamination, foil embossing, or ink-and-wipe patina).

• Design a three-step visual demonstration board (Step 1 Setup, Step 2 Action, Step 3 Check) with real mounted sample strips.

• Rehearse a clear 90-second tabletop skill demonstration with a partner.

Essential vocabulary

• demonstration: Showing someone how a practical skill works step by step while explaining key tips.

• sequence: Putting actions in the exact 1-2-3 order needed for success.

• exemplar: A physical sample tile showing what each stage should look like.

• cue card: A short prompt card with bold keywords to guide your demonstration.

• troubleshoot: Warning learners about one common mistake and how to avoid it.

Three-step studio method

Step 1: Pick one focused technique: I choose 'Embossed foil with dark ink-and-wipe patina' and label my three board boxes Step 1, Step 2, and Step 3.

Step 2: Build and mount the three stage samples: I glue a raw embossed foil tile in Box 1, an ink-coated tile in Box 2, and a wiped high-contrast tile in Box 3.

Step 3: Add bold tips and rehearse: I write one keyword tip under each tile ('1. Foam mat under foil', '2. Brush dark wash in grooves', '3. Wipe high ridges gently') and rehearse with my partner.
