Pupil studio resources & worksheet — Three studio goals and baseline audit

Pathway: SUMMIT · Week 1 Part 1 · Big question: How do we audit our current studio skills across four visual disciplines to set three measurable targets?

Arrival check

When a studio artist starts a major portfolio unit, why do they begin with an honest baseline audit rather than only doing what they already find easy?

[ ] Auditing four skills side by side reveals the exact gap that will unlock the biggest improvement

[ ] It gives you concrete 'Day 1' visual evidence to prove how far you have progressed by Week 7

[ ] Measurable targets turn vague wishes into deliberate studio action

Starter visual cues

Quadrant 1 (Observational contour): Continuous and varied-weight line study of an architectural or symbolic form.

Quadrant 2 (Dry tonal control): Five-step value ladder plus shaded 3D form in 2B-6B graphite.

Quadrant 3 (Wet media control): Diluted ink wash transition from deep shadow to highlight.

Quadrant 4 (Compositional layering): Cut/torn collage balance with figure-ground contrast.

Vote: What makes a studio development target genuinely 'measurable' rather than vague?

Studio practice planner

Configure your baseline audit focus and three development targets.

Shapes/Focus: Quad 1: Varied contour weight, Quad 2: 5-value graphite form, Quad 3: Graded ink wash, Quad 4: Figure-ground collage

Tools/Methods: Target: Wet-on-dry wash edge, Target: Cross-contour shading, Target: High-contrast palette, Target: Layered mixed media

Exit ticket

What are the three ingredients of a strong, measurable studio development target?

[ ] The specific medium, the technical control skill, and the visual evidence you will produce

[ ] Only the name of a colour

[ ] A wish with no plan
