# Tier pack: Supported route — Recording an exhibition: three visual moments

Pathway: SUMMIT · Week 6 Part 1 · Big question: How do we capture rapid observational sketches, spatial notes, and lighting analyses from curated artworks?

## Supported route studio steps

Step 1: At station 1, sketch the main frame shape and draw an arrow showing where the lamp shines from.

Step 2: At station 2, shade the dark, mid, and light areas into your tonal thumbnail box.

Step 3: At station 3, copy one close-up texture pattern into your close-up box.

Step 4: Tick and complete the three observation notes on your clipboard sheet.

## Success check

Three station sketches (space, tone, texture) and observation notes completed on clipboard.

## Key words helper

• field sketch: A rapid, observant drawing made directly in front of an artwork to capture structure, light, and mark-making.

• visual moment: A specific focal aspect of an exhibition (how a piece is lit, how two works contrast, or how a joint is made).

• shorthand mark: Fast, expressive hatching or stippling that records surface texture in seconds.

## Review checklist

[ ] Check that all three sketch zones on your Inquiry sheet are completed with clear tonal contrast.

[ ] Verify that your live pointer annotations name specific materials, lighting angles, and visual effects.

[ ] Keep your completed Inquiry sheet safe at the front of your portfolio for next week's critical review.
