Tier pack: Supported route — Drafting a structured visual review

Pathway: SUMMIT · Week 7 Part 1 · Big question: How do we synthesise our exhibition field sketches and portfolio evidence into a structured critical review?

Supported route studio steps

Step 1: Mount your best Week 6 sketch onto the '[Fig. 1]' box on your Critical review sheet.

Step 2: Complete the four structured review boxes (1. What the exhibition showed, 2. How tone and texture worked, 3. How lighting helped, 4. What I learned for my own art).

Step 3: Draw a pointer arrow from your writing to your sketch.

Step 4: Put all your Weeks 1-7 sheets in order inside your portfolio wallet.

Success check

Sketch mounted, four review sections completed with pointer arrow, and portfolio sequenced.

Key words helper

• critical review: A structured analytical evaluation of an exhibition or artwork backed by concrete visual and technical evidence.

• visual evidence: Specific details you observed and sketched (such as a 5-value contrast ratio, laminated relief depth, or raking light angle).

• thesis: Your central overarching argument about why the exhibition or artwork succeeds visually.

Review checklist

[ ] Check that your written review explicitly cites '[Fig. 1]' and '[Fig. 2]' on your board.

[ ] Verify that all sheets from Week 1 to Week 7 sit in clean numbered order in your portfolio.

[ ] Share your central critical thesis sentence with a table partner.
