Muscle Pairs · Tier Pack · Supported

Learning goal: I can find a pair of arm muscles and show which muscle pulls to bend or make the arm straight.

Supported Route (Book First)

Match Pulls and Rests labels to the bent arm and straight arm pictures.

Help: Point to the fat, short muscle. That muscle pulls.

Optional Make It · Supported

Make a pull and rest slider

Place a paper pointer on the muscle that pulls on your arm card. Copy or stick your labels in your book.

Word Help

muscle: a body part that pulls on a bone to make it move

joint: a place where two bones meet and bend

pull: when a muscle gets short and tight to move a bone

relax: when a muscle goes soft and long

Exit Check

Point to the muscle that pulls when your arm bends up: top or back?
