Balanced Plate · Staff Answers

Learning goal: I can use a plate guide to see which food groups take up the most space.

Arrival Answers

1. Box 1 shows the plate guide.
2. Apple, carrot, peas, or broccoli.
3. Our bones and teeth.
4. Yes. You can ask or pass.

Starter & Hinge Answers

Starter: A. The size of each section shows how much of that food group our body needs.

Hinge: A. Fruit and vegetables and starchy carbohydrates make up over two thirds of the plate guide.

Evidence Desk Cards

Peas, carrots, and berries: Big space: fruit and veg fill over a third of the plate.

Potatoes, pasta, and oats: Big space: starchy foods give our main steady energy.

Beans, lentils, and fish: Medium space: a palm-sized share builds and mends body parts.

Milk, cheese, and yoghurt: Medium space: gives calcium for strong bones and teeth.

Vegetable oil and butter: Tiny space: only a very small amount is needed.

Bag of sugary sweets: Tiny space off the plate: eat less often and in small amounts.

Check & Repair Answer

Our body needs lots of fruit, veg, and starchy food, and only a tiny bit of oil or spread.

Exit Ticket Answers

1. Fruit and veg. 2. Milk, cheese, or yoghurt helps keep bones and teeth strong. 3. Because our body needs large shares of fruit, veg, and starchy food, moderate protein and dairy, and only tiny amounts of oil/sweets.
