Food Sources · Teacher and Cover Plan

Learning goal: I can say if a food comes from a plant or an animal and group animals by what they eat.

Scheme Outcome

BASE Science scheme of work, Unit 1 (Skeletons, Muscles and Nutrition), Topic: Trace everyday foods to plant or animal sources and group animals by diet (herbivore, carnivore, omnivore).

Trace familiar foods back to a plant or animal source and sort animals into plant eaters (herbivores), meat eaters (carnivores), and both (omnivores).

Success Criteria

I can sort foods into plant source and animal source.

I can trace bread back to wheat and cheese back to milk.

I can sort animals into plant eaters, meat eaters, and eaters of both.

Model Sequence (I do)

First, look past the shop packet. Bread comes from wheat plants, and chips come from potato plants.

Second, check animal sources: eggs come from hens, and dairy cheese comes from milk.

Third, group animals by what they eat: plants only (herbivore), meat only (carnivore), or both (omnivore).

Some meals have more than one source. A cheese and

tomato pizza has wheat and tomato (plants) plus cheese (animal).

When we classify an animal's diet, we check all its food clues, not just one meal.

For example, a robin eats berries AND worms, so it is an omnivore.

We Do & Hinge Check

A brown bear eats berries, roots, and river fish. Which group does the brown bear belong to?

Answer: A. Berries and roots are plants, and fish are animals, so the bear eats both (omnivore).

Safe Practical & Card Setup

Sort the food source cards and animal diet cards onto the matching mats.

Kit: Printed Food Source cards (Plant / Animal) and Animal Diet cards (Herbivore / Carnivore / Omnivore).

Use printed cards on a flat desk. Keep walkways clear.

You Do Routes (Supported, Independent, Aspire)

Supported: Sort six food cards into Plant or Animal, and match Rabbit, Owl, and Robin to what they eat. (Help: Wheat and potato = plant. Milk and egg = animal. Rabbit = plants only.)

Independent: Trace four foods to their plant or animal source, then sort three animals into herbivore, carnivore, and omnivore with a because sentence. (Help: Bread comes from __ (plant). A robin is an __

because it eats __ and __.)

Aspire: Break a cheese and tomato sandwich into three parts (bread, butter/cheese, tomato) and trace each part to its plant or animal source. (Help: Bread comes from __ (plant), tomato comes from __ (plant), and cheese comes from __ (animal).)
