Fair Test · Tier Pack · Supported

Learning goal: I can plan a fair test by naming what to change, what to measure, and what to keep the same.

Supported Route (Book First)

Match Canopy Size, Fall Time (s), and Drop Height (1.5 m) to Change, Measure, and Keep the Same.

Help: Change = canopy size. Measure = fall time in seconds. Keep the same = drop height and load mass.

Optional Make It · Supported

Build a Variable Match Mat

Place the pre-printed cards into Change, Measure, and Keep the Same on your mat and copy the three headings into your book.

Word Help

independent variable: the one factor we change on purpose in a fair test

dependent variable: the factor we measure to see the effect of our change

control variable: a factor we keep the same so the test is fair

fair test: an investigation where only one factor is changed while all others are kept constant

Exit Check

In the parachute plan, what is the one variable we change (independent variable)?
