

TA / teacher briefing

Job 9 review pack: hinge after I-do, challenge ladder in We-do, pupil voice at Exit. No lesson has been edited or landed. Humanities stages are source-verified; Science stages are scheme-level proposals. LAUNCH Science W06 is preparation only, outside the live assessment.

Run the 10-minute briefing

Time	Routine	Say / rehearse
0:00–1:30	Locate the sequence	A hinge after I-do; B ladder in We-do; C Exit. Science placements are proposals until the actual lesson is checked.
1:30–3:00	Hinge	Ask one question. Every pupil responds together by whiteboard, finger-vote, symbol card, thumbs or point. Scan responses before choosing the next move.
3:00–4:30	Challenge	Ask recall → explain → apply/evaluate. Everyone hears the top rung; use the blue way in and green stretch as needed.
4:30–6:30	TA scaffold	Wait for self-scaffolding, then prompt, clue, model one step, correct only if needed. Move down only when stuck; move back up as soon as possible.
6:30–8:00	Independent & codes	Agree adult coverage for the Independent stage and swap roles across the week. Record actual support or independence, not a planned code.
8:00–10:00	Exit handoff	Hear the four pupil-voice answers; cue Read it back (?). TA passes the prompt level reached and what was independent to the teacher.

The three visible moments

A · hinge after I-do

One question; every pupil responds at once. Choose whiteboard, finger-vote, symbol card, thumbs or point. Look across the whole group.

10-second decision: most right → move on · split → pair check · most wrong → re-teach the I-do step.

B · ladder in We-do

Recall → explain → apply/evaluate. **Everyone hears the top rung; scaffold the route, don't lower the rung.** Blue way in; green deeper stretch.

Five scaffolding layers

Self-scaffold → prompt → clue → model → correct. Wait and let the pupil use the source or agreed access aid; ask open questions; narrow the clue; show one step then let the pupil try; give one direct fact only if still needed. **Move down only when the pupil cannot go on; move back up as soon as they can.**

Teacher time at Independent

One adult works with supported pupils while the other holds the group; **swap roles across the week.** Agree who does which before teaching. Job 9 says **TEACHER-TIME: NONE — flag** for all 36 ids because this exchange is not specified in the verified stages; schedule it rather than claiming it already occurred.

Codes, pupil voice and handoff

Full feedback code set — mark actual events only

Code	Meaning and when it appears
VF	Verbal feedback actually given after a hinge response or at Review.
WS	Work completed with support in We-do or Independent; note the prompt level.
I	The pupil's own independent content decision in Independent.
NS+	One specific next step given at Review or Exit, linked to the work.
E	E: evidence captured on Cypher — at Independent or Exit, only for an observed action.
R	At the next Arrival, the pupil responds to NS+ and the adult engages with it; then close the loop.
//	The point where the pupil actually self-edits after feedback at Review.
?	The Exit "Read it back" cue; receive the pupil's response by their agreed mode.

Record on the paper grid or straight into Cypher on the tablet — one or the other, not both.

Close the loop: NS+ → pupil responds at a later opportunity (usually next Arrival) → adult engages → R. // needs an actual self-edit. ? needs a read-back response.

C · Exit: four pupil-voice questions

1 What am I learning? · 2 What feedback did I get? · 3 What do I need to improve? · 4 How do I know I've got it?

Illustrations from Job 9 tasks, not assumed pupil responses or feedback. Use the actual goal and work. Pathways may use BUILD with an adult and point, sign or use symbol/AAC.

Pathways

1. "I'm finding the school here" (points to the displayed goal or symbol with an adult).
2. "You said check the picture key" (shows or selects the actual cue).
3. "Next, this one" (points to the next single action).
4. "The L matches the key" (indicates the checked example).

BUILD

1. "I'm learning the parts of this plant" (points to the diagram).
2. "You said I labelled the roots correctly."
3. "Next I need to check the stem label."
4. "The label points to the right part."

GROW

1. "I'm finding a grid square using eastings then northings."
2. "You said I swapped the two pairs."
3. "Next I'll read eastings first."
4. "The square matches both numbers on the grid."

LAUNCH

1. "I'm evaluating two climate responses."
2. "You said my benefit needs a source."
3. "Next I'll add evidence and a limitation."
4. "I used the same criterion for both choices."

TA → teacher handoff at Exit

Pass on the **deepest prompt layer reached, what the pupil then did independently**, response mode/access aid and one remaining content barrier. Teacher chooses one actual NS+; at the next opportunity receive the response and engage before R. Do not infer an EHCP outcome or invent a unit code.

Emotion coaching

Adult regulates first. Keep words short; use the visual cue.

- 1

Notice. See a change in pace, posture, voice or participation. Settle your own voice and pace first.
- 2

Name plainly. Say what you see. Use a body signal if an emotion label does not land.
- 3

Validate privately. Acknowledge that this feels hard, calmly and without an audience.
- 4

Neutral boundary. State one short safety or task limit; offer the agreed pause or a choice.
- 5

Solve when regulated. Return with one small step. Talk it through later, even next day.
- 6

Regulate, then process. At a calm check-in, rehearse the signal, choice and repair.

What it is not

Not letting it go · not talking them out of it · not a long chat mid-meltdown.

Space, not closeness

Use the pupil's agreed supervised place and return cue. Do not insist on proximity.
