Humanities · LAUNCH · Autumn 2 · Week 2 · HUM-LAUNCH-A2-W02

Knowledge organiser

Use digital mapping or GIS to describe a place.

It shows one type of information on a map. No. You also need to know how many people live in the area.

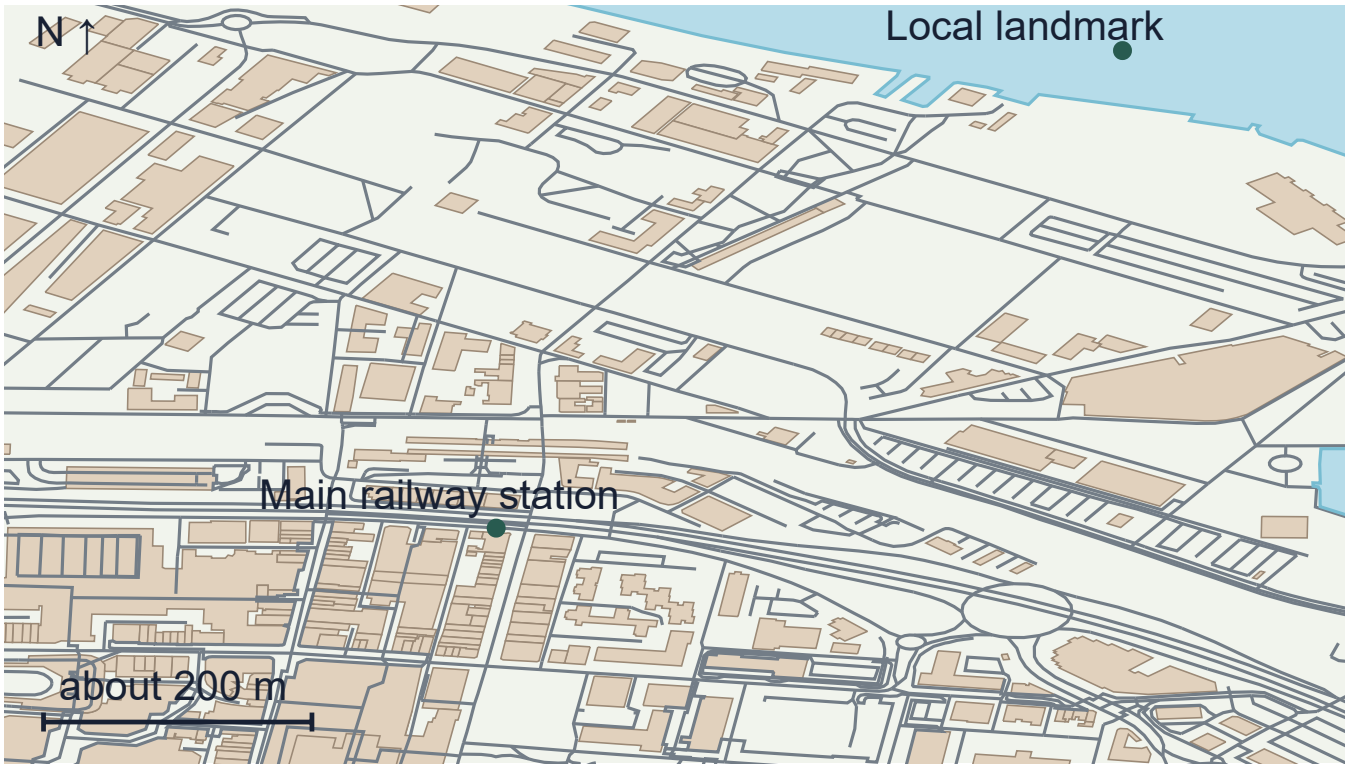

Tier	Word	Meaning
Tier 2	settlement	A place where people live
Tier 2	urbanisation	Growth in the share of people living in urban places
Tier 2	land use	What land is used for
Tier 2	GIS	Mapping information in separate data layers

The source shows ____. This helps me explain ____.

Made by Matt

Local map and its layers

Supplied local map of railway station, well-known local landmark, roads, buildings and water; north points upwards. Approximate scale bar about 200 m.

Use the drawing alongside the evidence cards.

Made by Matt

Evidence cards A and B

A · Local reference points

The main railway station and the local bridge are reference points on our digital map. Toggle layers to examine their positions. the civic building lies beyond this map’s southern boundary.

These points alone cannot show population density or prove why development happened.

B · Reasons places grow

Work, transport and services can attract people and businesses. A growing town may need more homes and infrastructure. Population growth can also occur within existing settlements.

A reason is a hypothesis until tested against evidence for a particular place.

Made by Matt

Evidence cards C and D

C · Practice land-use sample

Fictional practice tally: shops 8, homes 12, public services 4, green spaces 6. This is training data only. Replace it with your labelled observations for the fieldwork enquiry.

This example does not describe every person or place.

D · Contrasting reference place

Compare a small centre such as the smaller centre with the larger centre at comparable map scales. Record the area, source and observation round.

One sampled street does not represent a whole settlement.

Humanities · LAUNCH · Autumn 2 · Week 2 · HUM-LAUNCH-A2-W02

Shared investigation

Toggle road, building and place layers on the supplied local map. Compare what becomes visible and what remains uncertain. Take a turn to suggest a match, then check the evidence.

1. What does a GIS layer do?
2. Which clue supports your answer?
3. Can building outlines alone establish population density?

Evidence or step	Check
What does a GIS layer do?	Add your answer or card clue.
Which clue supports your answer?	Add your answer or card clue.
Can building outlines alone establish population density?	Add your answer or card clue.

Our explanation

Optional · respond to feedback together

Optional: show one map comparison to an adult. Hear one piece of feedback. Reply with a change, a reason to keep it or a request for help.

My response or improvement

We do decision checkpoint

Which claim can you check with the roads layer?

1. Where the roads run
2. How many people live in a square
3. Why a town first grew

My claim and clue

Made by Matt

Worked model

Ask the question

It shows one type of information on a map. Use card A. The station and the local landmark help you find your position.

Find the evidence

The station and the local landmark help you find your position. The road layer shows routes. The building layer shows outlines.

Explain the link

Compare the same area with layers on and off. The source shows ____. This helps me explain ____.

Check what we know

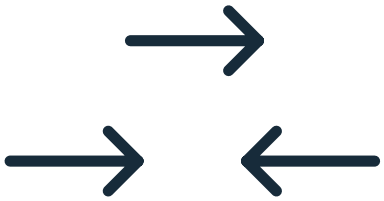

No. You also need to know how many people live in the area. A layer only shows what its source records.

You may point, choose or pass.

3. What does a GIS layer do? Which detail supports your answer?

4. Can building outlines alone establish population density?

Point, speak, sign, draw, write or choose. You may pass. An adult may note your own words or choice.

Made by Matt

Humanities · LAUNCH · Autumn 2 · Week 2 · HUM-LAUNCH-A2-W02

You do · Aspire

Staff mark I · S · C beside the task.

1. Start in your book. Capture or print an annotated map with at least two layers.
2. Locate two features and describe a spatial pattern.
3. Answer an independent question about what the map cannot establish.
4. Explain how scale, incomplete data or a missing layer could change your interpretation.

Word bank: settlement · urbanisation · land use · GIS.

My example and card detail

My reason and check

Point, speak, sign, draw, write or choose. You may pass. An adult may note your own words or choice.

Made by Matt

Edit in the same colour, on the same page.

What does a GIS layer do? Use one clue.

Can building outlines alone establish population density?

Point, speak, sign, draw, write or choose. You may pass. An adult may note your own words or choice.

Explain one idea in your own words.

Check a source. Show what it says about your idea.

Pupil voice

What helped you most today, or what would you change next time?
