From fieldwork to spreadsheet and graph

Humanities · LAUNCH · Autumn 2 · Week 5 · HUM-LAUNCH-A2-W05

Staff card

Staff print card

3 November 2026

Invite a response. Give thinking time. The learner may pass.

Arrival regulation check: Green · Ready, Amber · Help, Red · Pause. Say the words as well as showing the colours. Invite a response and allow a pass.

Code	Meaning
VF	Verbal feedback
WS	Worked with support
I	Independent
NS + …	Next step
E	Evidence captured
R	Pupil responded to feedback
//	Self-edit point
?	Read this back to me

At check-out, record E for … against the pupil's target.

Mark R only after the pupil has responded to feedback with an adult.

Return-to-learning route for this lesson: after a pause, rejoin Supported with the first tally row and the category/count table.

Soft instrumental music for transitions if the class plan says so

Sound is off by default.

Pupils edit in the same colour, on the same page.

Made by Matt

P17 · SLT planning and evaluation

Record fieldwork in a spreadsheet and graph it.

Stage	Minutes
Arrival including opening	4
Starter	3
I do	6
We do shared investigation	7
We do decision checkpoint	2
You do	12
Review and improve	3
Exit ticket	3

Planned adaptations

Need	Plan
Read or sequence	Use one card and one short instruction.
Communicate	Allow a private point, sign, spoken answer or exact scribing.
Pause and return	Return-to-learning route for this lesson: after a pause, rejoin Supported with the first tally row and the category/count table.
Access the drawing	Use the larger view or describe the marked features.

Catch-up embedded this lesson: revisit the distinction between raw tallies and category counts in Starter.

If behind

Keep one model clue, one shared check, the checkpoint, a book response and the exit. Shorten repeated practice.

Staff evaluation

Evidence, adaptation and next teaching move

P18 · Individual target opportunities

Use the learner’s actual agreed target.

Opportunity	Evidence	Actual support
Find a clue	Select a card detail.	_____
Explain	Link evidence to the answer.	_____
Check	Keep or revise one detail.	_____
Regulate	Use a pause or a private response.	_____

The teacher models one step. A second adult, if available, reads a card or records the exact response. With one adult, set out the card and return for the pupil’s reason.

Give time, point to a clue, ask a short question, then offer a frame or choice. Invite a response. The learner may pass.

Made by Matt

Humanities · LAUNCH · Autumn 2 · Week 5 · HUM-LAUNCH-A2-W05

First lesson back · once-only read

Check what pupils can show from the previous lesson and revisit it within the planned stage.

Use the supplied examples. Invite a response, give thinking time and allow a pass. Use only the learner’s own evidence.

Teacher answers · Arrival

Arrival · Supported

Point to the picture that matches the top one.

The lower left picture matches the top one.

Arrival · Supported

Which meaning fits settlement?

A place where people live

Arrival · Supported

Why is a bar chart suitable for land-use categories?

It compares counts across separate categories.

Arrival · Supported

What if fieldwork data are missing?

Use clearly labelled practice data for the skill, then collect genuine observations before assessing the fieldwork enquiry.

Arrival · Independent

Point to the picture that matches the top one.

The lower left picture matches the top one.

Arrival · Independent

Which meaning fits settlement?

A place where people live

Made by Matt

Arrival · Independent

Why is a bar chart suitable for land-use categories?

It compares counts across separate categories.

Arrival · Independent

What if fieldwork data are missing?

Use clearly labelled practice data for the skill, then collect genuine observations before assessing the fieldwork enquiry.

Arrival · Aspire

Point to the picture that matches the top one.

The lower left picture matches the top one.

Arrival · Aspire

Use settlement in an accurate example.

A settlement is a place where people live. Card C gives a sample from a settlement with homes, shops and public services.

Arrival · Aspire

Why is a bar chart suitable for land-use categories? Which detail supports your answer?

It compares counts across separate categories. The practice chart has separate bars for homes and shops, so you can compare 12 homes with 8 shops.

Arrival · Aspire

What if fieldwork data are missing?

Use clearly labelled practice data for the skill, then collect genuine observations before assessing the fieldwork enquiry.

Made by Matt

Starter

Which bar is tallest?

Homes, with 12.

Starter

What does the vertical scale count?

Recorded uses, with one value for each category.

Starter

Why is a bar chart suitable for land-use categories?

It compares counts across separate categories.

Starter

What if you have no fieldwork tally?

Use the labelled practice data to learn the skill. Collect actual observations before drawing a fieldwork conclusion.

I do · 1

Why is a bar chart suitable for land-use categories?

It compares counts across separate categories.

I do · 1

Which source helps us begin?

Use card C. The practice tally records shops 8, homes 12, public services 4 and green spaces 6.

Made by Matt

I do · 2

Which detail in the card can help with the question?

The practice tally records shops 8, homes 12, public services 4 and green spaces 6.

I do · 2

What does this clue help us say?

Each bar shows a count for a distinct category. Check the table against the raw tally before interpreting the bars.

I do · 3

How could I explain the link?

Transfer categories and counts, label the axes and units, then read a pattern supported by the chart.

I do · 3

How can I start my answer?

The most common recorded use was ____ at ____. This sample shows ____ but cannot show ____.

I do · 4

What if you have no fieldwork tally?

Use the labelled practice data to learn the skill. Collect actual observations before drawing a fieldwork conclusion.

I do · 4

What is one limit to keep in mind?

A practice chart does not give evidence about a real enquiry area.

Made by Matt

We do

Which column holds the names?

The category column.

We do

Which column holds the numbers?

The count column.

We do

What should you verify against the tally?

Check every label and value, including shops 8 and homes 12.

We do

Which clue will you use?

The practice tally records shops 8, homes 12, public services 4 and green spaces 6.

We do

What is one limit?

A practice chart does not give evidence about a real enquiry area.

We do decision checkpoint

Which choice fits the evidence?

A bar chart.

Made by Matt

We do decision checkpoint

What evidence helps you decide?

Its bars compare counts for separate named categories.

Made by Matt

Teacher answers · You do

You do · Supported

Check the detail you used.

The practice tally records shops 8, homes 12, public services 4 and green spaces 6.

You do · Supported

Check your reason or limit.

Each bar shows a count for a distinct category. Check the table against the raw tally before interpreting the bars. A practice chart does not give evidence about a real enquiry area.

You do · Independent

Check the detail you used.

The practice tally records shops 8, homes 12, public services 4 and green spaces 6.

You do · Independent

Check your reason or limit.

Each bar shows a count for a distinct category. Check the table against the raw tally before interpreting the bars. A practice chart does not give evidence about a real enquiry area.

You do · Aspire

Check the detail you used.

The practice tally records shops 8, homes 12, public services 4 and green spaces 6.

You do · Aspire

Check your reason or limit.

Each bar shows a count for a distinct category. Check the table against the raw tally before interpreting the bars. A practice chart does not give evidence about a real enquiry area.

TA Brief

Record fieldwork in a spreadsheet and graph it.

Arrival regulation check: Green · Ready, Amber · Help, Red · Pause. Say the words as well as showing the colours. Invite a response and allow a pass.

Use the supplied examples. Invite a response, give thinking time and allow a pass. Use only the learner’s own evidence.

Return-to-learning route for this lesson: after a pause, rejoin Supported with the first tally row and the category/count table.

Optional: show one checked value or graph detail to an adult. Hear one piece of feedback. Reply with a change, a reason to keep it or a request for help.

Use one route. Record only the pupil’s own response and the support given. Next lesson: Comparing places through online evidence.

Made by Matt

Humanities · LAUNCH · Autumn 2 · Week 5 · HUM-LAUNCH-A2-W05

Teaching script · Arrival including opening

Use one Arrival route. Let pupils match the picture before reading the other prompts. Give time to think and allow a pass. Arrival regulation check: Green · Ready, Amber · Help, Red · Pause. Say the words as well as showing the colours. Invite a response and allow a pass.

Made by Matt

Humanities · LAUNCH · Autumn 2 · Week 5 · HUM-LAUNCH-A2-W05

Teaching script · Starter

Use the drawing to ask: Which bar is tallest? What does the vertical scale count? Catch-up embedded this lesson: revisit the distinction between raw tallies and category counts in Starter.

Catch-up embedded this lesson: revisit the distinction between raw tallies and category counts in Starter.

Made by Matt

Teaching script · I do

Ask Why is a bar chart suitable for land-use categories? Point to card C. Think aloud: It compares counts across separate categories. The practice tally records shops 8, homes 12, public services 4 and green spaces 6. Check: What if you have no fieldwork tally? Use the labelled practice data to learn the skill. Collect actual observations before drawing a fieldwork conclusion.

Made by Matt

Humanities · LAUNCH · Autumn 2 · Week 5 · HUM-LAUNCH-A2-W05

Teaching script · We do shared investigation

Transfer a practice tally into the prepared table. Choose a bar chart and check category names, values and units. Take a turn to suggest a match, then check the evidence. Ask for a clue. The category column.

Made by Matt

Teaching script · We do decision checkpoint

Offer a private choice. Which graph fits a tally of separate land-use categories? Reveal: A bar chart. Its bars compare counts for separate named categories. Optional: show one checked value or graph detail to an adult. Hear one piece of feedback. Reply with a change, a reason to keep it or a request for help. Mark R only after the pupil has responded to feedback with an adult.

Made by Matt

Teaching script · You do

Select one route. Start in your book. Enter your own previous-lesson data into the editable spreadsheet. Retain the learner’s own checked value or graph detail and actual support used. Return-to-learning route for this lesson: after a pause, rejoin Supported with the first tally row and the category/count table.

Made by Matt

Humanities · LAUNCH · Autumn 2 · Week 5 · HUM-LAUNCH-A2-W05

Teaching script · Review and improve

Check one evidence detail. Each bar shows a count for a distinct category. Check the table against the raw tally before interpreting the bars. Ask for one improvement or reason to keep the detail.

Made by Matt

Teaching script · Exit ticket

Use the two exit questions. Why is a bar chart suitable for land-use categories? What if you have no fieldwork tally? Accept accurate equivalents and plan the next prompt. At check-out, record E for … against the pupil's target.

Explain one idea in your own words.

Check a source. Show what it says about your idea.

What helped you most today, or what would you change next time?

Made by Matt
