Four sectors

A sector is a broad area of work. These cards give examples. They do not name real employers. A job may fit more than one work area.

Source card	Source card
HC Health and care People in this work area give care and treatment. They need many kinds of job to help the service run. This work could be close by or take place across the country. These are examples; no real workplace is named.	ED Education People in this work area help others to learn. They need teachers and many other jobs to keep the setting working. This work could be close by or take place across the country. These are examples; no real workplace is named.
CO Construction People in this work area build or care for buildings. Many jobs help plan the work and carry it out. This work could be close by or take place across the country. These are examples; no real workplace is named.	RE Retail People in this work area sell goods. Many jobs help serve people, care for kit, keep records and plan work. This work could be close by or take place across the country. These are examples; no real workplace is named.

Use a job task as a clue. You may read, point, speak, type or use your usual aid. A reader or scribe can help as usual. You do not have to choose your own future job.

Work types and a job family

These types can overlap. They are not ranks or steps. One job can have more than one type of work.

Role type	Work description
Frontline	Work that gives the main service or does the main task.
Technical	Work that uses special kit, systems or methods.
Professional	Work that uses expert knowledge and sound choices.
Support	Work that helps a team or setting run well.
Management	Work that plans people, time, kit and tasks.

A job family

A job family groups related occupations by similar work or tasks. It can cross sectors.

Related jobs: Administrator, Receptionist, Records assistant.

Shared tasks: Organise information. Keep accurate records. Pass messages to the right person.

An administrator could organise records in health and care, education, construction or retail. The workplace sector changes; the occupation and related tasks may remain similar.

My four sector map

Use this shape in your book or Type instead. Put a job in each sector. Add more jobs to show the range of work.

Sector	Jobs	Why it fits and card
Health and care	_____	_____
Education	_____	_____
Construction	_____	_____
Retail	_____	_____

Explain sector and occupation. Give an example of each. Use a task clue in each row. Show the five work types. Add a job in two sectors and a job-family link. Keep your first idea and any change.

The sector is ... . The job is ... . It fits because the card says ... . This job could work in ... and ... because ... .

Floor choices for four sectors

Use these choices if they help. Show one job in each sector. Point to its work task. You may use a reader, scribe, usual aid or typing. Keep all four rows.

Sector	Two job choices
Health and care	A: Care assistant B: Bricklayer
Education	A: Classroom assistant B: Checkout assistant
Construction	A: Bricklayer B: Classroom assistant
Retail	A: Checkout assistant B: Care assistant

Two work words

Which is the broad work area: retail or administrator? Which is a kind of job: education or teacher? Show how they differ. You can speak, point, type or use your usual scribe.

Use extra cards to show work types, a job in two sectors and a family link. The adult keeps what you showed and any answer help. No public answer is needed.

A prompt and adult checks

A made up profile prompt

A fictional learner has shortlisted construction and care work. They know both areas contain many jobs but do not yet know the different tasks. Their next question is: which occupations could I investigate within each area?

Use this if you have no old profile or prefer it. Or look at your own old profile in private. Find one work area and a question. No final choice is needed.

Adult check key

Keep this key apart from first choices. An adult answer is not the learner’s own work.

Sector	Job and clue
Health and care	Care assistant. The care assistant supports people with agreed daily care tasks.
Education	Classroom assistant. The classroom assistant supports agreed learning activities.
Construction	Bricklayer. The bricklayer builds walls from a plan.
Retail	Checkout assistant. The checkout assistant helps customers pay for goods.

Word checks: retail is a sector; administrator is a job. Education is a sector; teacher is a job. Four real choices can show the four map rows. Check the word meanings too. Keep other map parts apart. Keep usual access as answer help fades.
